It was a follow-up to a resident complaint. MR. LEWIS: Okay. MS. STEWART: And they basically sent us a notice, and both Sonny had a conversation with them and I had a conversation with them are port in regards to the work that was done. They sent out a formal letter asking for stabilization of the unstabilized areas, and we reached back out to them to ask if we could have an on-site meeting so that they could better understand what the pre-work conditions were. MR. LEWIS: Thank you. MS. STEWART: You're welcome. MR. MENDENHALL: Anything else to report on, Tonja?

Page 9 Page 11 1 1 mention the issue of the townhouse project? proposals to do what we refer to as Geotubing. 2 2 This was the project where we had negotiations Basically they just take the fabric, lay 3 with them and gotten with them to agree as a 3 it out, they dredge up some of the sediment in 4 4 zoning condition to preserve a drainage the pond, and they basically fold the material 5 5 easement for the flow of water from that over it, you know, and it creates like a tube, 6 project, and the CDD, so that there wouldn't 6 and then what we'll do is, we'll put plants on 7 7 be flooding issues created. it after that. 8 8 They're in the process right now -- I One of the other products is kind of a 9 9 think Tonja is going through their plan woodland material, but same philosophy. One 10 approval -- and the EPC indicated that, at 10 of the things I was telling Doug earlier today 11 least in written comments, it did not want a 11 is that in researching both products, there is 12 12 drainage easement because that area was going controversy over their longevity. Each one 13 13 to be a conservation area. will probably claim that they have longevity, 14 14 So I just talked with Tonja about it a but then the others will claim that they 15 little bit ago, and I think she's going to 15 16 follow up with the EPC about that issue, too, 16 So our point of this is, we really don't 17 just to make sure that if we don't have the 17 need longevity out of the products because we 18 drainage easement that's going to -- we're 18 really want the roots of the plants to be the 19 19 still going to be protected to the extent that part that gets stabilized, so I'm not 20 20 we had planned to be when we negotiated that concerned with any of the products that has 21 zoning condition. 21 longevity. 22 22 Is that right, Tonja? So we basically went with the least 23 MS. STEWART: Yes, that is correct. And 23 expensive, and the good news is, in the last 24 I believe one of the people that is going to 24 discussion we had in regard to future erosion 25 25 be in this inspection tomorrow is someone who costs, we were using \$110 a lineal foot Page 10 Page 12 1 1 will be able to assist us in figuring out how figure, and this product has come back at \$37 2 2 to address, you know, the overlap between a lineal foot. 3 3 So we're hoping we're finding a product conservation area and drainage, so I think 4 4 tomorrow -that's more reasonably cost. It's not a 5 5 MS. McCORMICK: Right. So I think after permanent erosion solution. It still is 6 6 the meeting tomorrow -- I mean, certainly by something that needs the plants to work with 7 7 the April meeting we will be able to report it, but I think we found a plant that is 8 8 back to the board on both of those issues, if working for us now, so I think we have kind of 9 not before that. 9 gotten over that hurdle. 10 10 MR. MENDENHALL: All right. Any So it looks like our lineal foot price 11 questions -- other questions for Tonja? 11 has come down a little bit, so that's good 12 12 MR. MILLS: Yes. There are other 13 13 proposals in here, lake and wetland MR. MAYS: So, Tonja, do you want to let 14 14 management. Is that something that she needs them know which company that we think is the 15 to be a part of the discussion on, or is that 15 one we want to go with and see if we can 16 something, Doug, you're going to address? 16 get --17 17 MR. MAYS: Well, I thought we were going MS. STEWART: Yes. Crosscreek 18 18 to address it together. Environmental is the company that we're 19 Tonja, did you want to bring up those 19 recommending to do the next phase of this 20 20 other erosion repairs? work. 21 And, Doug, you can obviously present the 2.1 MS. STEWART: Oh, sure. Basically we 22 solicited proposals for the erosion repairs 22 proposal and the cost. The other two were 23 that we mentioned in the past. We have 23 Lake & Wetland and Dragonfly Works. 24 discovered around through (inaudible) three 24 Dragonfly Works was going to do another 25 different areas to be able to provide 25 Geotube product, and the Lake & Wetland was

And I'll leave it at that. 8 MS. STEWART: I'm hearing it. I 8 become a bigger deal in the past year or so, 9 9 completely understand. I appreciate it. And at some point a number was thrown out that the 10 10 we'll fix it. But I promise you we have made ultimate fixed cost could be \$5,000,000. 11 11 much more progress. You'll be fairly happy to And so we're trying to figure out a 12 12 hear, I think, at the end of the day where we smart way of dealing with this before it's a 13 13 \$5,000,000 fix and do it on this are. 14 MR. MENDENHALL: Mr. Chair. 14 piece-by-piece basis. 15 MR. MILLS: Yes. Thank you. So, Tonja, 15 I would just share with you that from my 16 my concern is that we've got -- excuse me --16 singular perspective, we don't have our arms 17 two quotes in front of us, neither of which 17 around it, so I think your question is 18 match up linear feet or project scope, and 18 excellent. I still don't think we have a -- I 19 you're detailing a third one that we still 19 don't have a clear understanding as to what 20 have not received. 20 our ultimate bad-case scenario is. I don't 21 And we've talked in the past about it 21 have a clear understanding as to what is the 22 being frankly unacceptable to be getting 22 best fix yet. 23 materials at this meeting that we did not get 23 I saw that in our package that our staff 24 in advance to review, and I find it 24 gave us the pond inventory that we've been 25 unacceptable to even act on this, absent of 25 asking for, but I was hoping for a little bit

Page 25 Page 27 1 1 the one that we're missing that you're MR. ROSS: Oh. So you could email it to 2 2 proposing that we accept. us real quick now, Tonja? 3 So if one says 190 feet and one says 360 3 MS. STEWART: I'm just pulling into a 4 4 feet or whatever, these quotes should match parking lot, so, yes, I can. 5 5 up, at least for the scope. Perhaps the MR. ROSS: Yeah, just -- okay. Great. 6 linear foot for the total project costs will 6 MS. WHYTE: Just email it over to my CDD 7 7 differ, and that's something this board could -- and I'll see if I can get it printed. 8 8 entertain, but we've got apples and oranges at MS. STEWART: Okay. All right. I'll do 9 9 this point, and a missing link on the third it right now. 10 10 MS. WHYTE: Thank you, ma'am. quote. 11 And while we would like to move forward 11 MR. LEWIS: Okay. 12 12 MS. WHYTE: She'll be back. with the stuff that needs to be done, to 13 13 Ms. Griffith's point, another 30 days isn't MR. MENDENHALL: I think the concern 14 14 going to kill us if we've already eroded to that Mr. Mills brought up is still probably 15 the property line. 15 going to be an issue, that you will get this 16 We're going to have to see better 16 additional info but doing a relative 17 alignment of these quotes in order to make 17 comparison among the three might be 18 informed and proper decisions on the expense. 18 challenging without having Tonja's summary 19 19 MS. STEWART: Would it be possible -- I report that kind of gives how she got the 20 20 have gotten them to apples and apples based on information to get them to apples and apples 21 my phone calls with the vendors and my reviews 21 by talking to each of the vendors. 22 of their proposals. I can provide the board a 22 So I think you still might have that 23 23 report explaining how I came up with the challenge, but, you know, that being said --24 recommendation I'm making in showing how the 24 MR. ROSS: I happen to agree with 25 25 proposals compare and who was the least everything Jim said, that it just adds to my Page 26 Page 28 1 1 frustration and underscores why I am expensive. 2 2 I have that information, Jim. Forgive frustrated. 3 3 me. Like I said, I've just done a very poor But all that being said, if this 4 4 job of communicating it. If it's possible proposal comes in and has similar lineal feet 5 5 maybe to allow for you all to review it and as the Dragonfly one -- I did the math real 6 6 quick -- it's a total of 560 linear square communicate directly to me with any questions, 7 7 then maybe allow for the chairman to make the feet and multiply that -- I forget what I --8 8 oh, the 37 bucks, and it came out to 20,000 final decision. If that's something possible, 9 9 and change, which would indicate it's the Andy? 10 10 lowest one. I just -- the reason I say that is 11 And so if it comes in and it's a 11 because I really want to feel comfortable that 12 12 two-page proposal, like most of these are, and we can get on these people's schedules, 13 then one of the two pages is nothing more than 13 because this dry season has been so excessive 14 a bunch of legalese, we may be able to cut to 14 that, like I said, I've got a lot of work 15 the chase pretty quickly if we can just get it, 15 being done in a lot of my other communities, 16 and --16 you know, because this is a huge window of 17 MR. MENDENHALL: Sure. 17 opportunity, and I just want to make sure we 18 MR. ROSS: -- I suggest we table this 18 get on the schedules. 19 issue and move on, and we can see if we can 19 MR. MENDENHALL: Mr. Ross. 20 get it back. 20 MR. ROSS: Is there any way somebody can 21 MR. MENDENHALL: We can do that. 21 call the vendor and see if they can email it 22 MR. MILLS: But the point I'm making, I 22 to either you or Sonny? 23 guess, can we resolve this today or not, is 23 MS. WHYTE: Tonja, could you email it 24 we've had these conversations before about 24 over to my CDD email? 25 last-minute information coming before us and 25 MS. STEWART: Yes.

Page 29 Page 31 1 1 expecting us to make -- this is not a \$500 particular agenda item will be prepared. 2 2 decision. It's \$25,000 or \$20,000, and I don't And they'll see it on there and say, 3 think we ought to be operating that way. 3 "Oh, I need to make that call," "I need to look 4 4 MR. ROSS: And I'm sorry if I'm hogging at that document," or "I need to go out and 5 5 inspect that," whatever. So I would like to the floor. But I actually prepared some notes 6 about the very point that you're talking 6 take advantage of that. 7 7 And then related to that -- at least in about, and maybe we'll later in the meeting --8 8 I don't know if it would be appropriate to my mind it's related -- the reality is, right 9 9 discuss it then, or I'm happy to get off point now, the majority of our board has been here 10 10 for less than two years, I think it is. and raise it now. 11 But I had thought about the very issue 11 MR. MENDENHALL: Yes. 12 12 that you're talking about. MR. ROSS: And the flip side of that is, 13 13 MR. MENDENHALL: Okay. Do you want to we've had the great, wonderful fortune of 14 14 talk about it in supervisor comments later, or having the same lawyer, the same engineer, the 15 15 do you want to discuss it now? same CDD staff, the same CDD manager. I mean, 16 16 that's pretty unusual, if you think about it, MR. ROSS: I'm happy to talk about it 17 now, and I may have to go look at my notes on 17 but the reality is, at some point that's not 18 my phone. 18 going to continue, and we're either going to 19 19 But one of the reasons why I was lose our district manager or we're going to 20 20 supportive of you being the chair is I feel lose, for whatever reason, an engineer or 21 like sometimes --21 counsel or staff are going to retire or 22 MR. CHESNEY: Running the meeting. 22 whatever. 23 23 MS. McCORMICK: Yes. So it underscores we can't do business 24 MR. ROSS: Running the meeting, thank 24 by anecdote. We can't do it by who remembers 25 25 what was said at what meeting. And so to the you. Page 30 Page 32 1 1 MR. MENDENHALL: Oh, I got promoted. extent, Andy, you can help us begin to -- as 2 Huh? 2 our district manager, document decisions we 3 MR. ROSS: Running the meeting -- thank 3 make, but also why we make the decisions. 4 4 you -- chairing the meeting, running the MR. MENDENHALL: Okay. 5 5 meeting. I feel like sometimes we lose track MR. ROSS: And I'll give you an example 6 6 that I was involved in. You remember the pond of stuff. 7 7 What will sometimes happen is, somebody off of Linebaugh --8 8 will say, "What about the benches?" MR. MENDENHALL: Sure. 9 And we'll say that to Doug and Sonny, 9 MR. ROSS: -- that we bought that chunk 10 10 and they'll say, "Okay. This is where we of land that included the lake, if you will? 11 are." Or someone will say to Erin, "What 11 MR. MENDENHALL: Yes. 12 12 about that legal issue?" MR. ROSS: I don't think it's documented 13 13 "Oh, okay." And we kind of lost track anywhere the particular reasons for that. 14 14 of it, and so we're dealing with such stuff on MR. MENDENHALL: You're right. 15 an anecdotal basis. What I would like you to 15 MR. ROSS: And can I see in ten years 16 do is, controlling and preparing the agenda, is 16 from now some future board saying, "Well, they 17 17 built some houses back there. We can flip take better advantage of old business. 18 18 MR. MENDENHALL: Sure. that land to so and so, and we'll get a nice 19 MR. ROSS: And maybe list some things on 19 little pocket of cash here." But we already 2.0 20 there that you hear us, the supervisors, deliberated that. 21 2.1 raise. "Let's come back to that planning And I'm not saying the future board 22 issue" or that bench issue or that contract 22 can't make their own decisions, but I think 23 issue. And just have it on there. And that 23 they should have the benefit of knowing that 24 way, will we not only lose track of stuff, but 24 this board already evaluated things. We 25 also the individuals who are in charge of that 25 tumbled through all the issues. We threw

Page 33 Page 35 1 1 things around. And we made the decision, no, MR. MENDENHALL: Sure. 2 2 we want to keep that as greenery. We want to MR. CHESNEY: I mean, that was why we 3 control our own pond. So I use that as example 3 started a much more comprehensive minutes. 4 4 of --But it can take you a while to find things. 5 5 MS. HESSLER GRIFFITH: It's in MR. MENDENHALL: That's a good example. 6 MR. ROSS: -- so I don't want to belabor 6 transcripts. Right? 7 7 MR. CHESNEY: Yes. the point, but this sort of segues into what 8 8 Jim was saying. I really would like you to MR. MENDENHALL: Uh-huh. And I'll just 9 9 tell you a couple of things that I found seems utilize your position as setting up the 10 agenda, being a little bit more assertive and 10 to work at other districts. 11 following up with people that you have asked 11 Number One, I keep a project list of 12 12 as supervisors and making sure issues don't everything I do for your district and other 13 13 get lost in the shuffle. districts, so at any time I can click a button 14 14 MR. MENDENHALL: Right. Now, all valid and get a report on what I'm working for the 15 15 points. Note for the record that Mr. Chesney district. 16 16 joined us. It looks like you have a question. I mean, really, your engineer, your 17 MR. CHESNEY: Well, no. I was going --17 attorney, your staff should be doing the same 18 I concur. I like the term "old business." 18 thing, and they are. Right? But as far as, 19 19 Keep a running list of some of these things you know, if there is any time you're looking 20 20 that we have going, because, I mean, I forget for, hey, what outstanding items is Tonja 21 about them until I sit here and then I start 21 working on? You know, that should be something 22 looking at all the things I have, you know --22 that can be easily generated. 23 23 MS. HESSLER GRIFFITH: And I can My only hesitation with putting it on the 24 probably even weigh in just sort of being new 24 agenda is then we kind of -- this agenda is 25 25 into this role. I've spent the past month essentially a business meeting -- right? -- so Page 34 Page 36 just trying to learn history, and I met with 1 1 the things that should go on here, we'll say 2 2 Andrew, I met with Mark Ragusa, I met with under "Engineer" just as an example, are items 3 3 Sonny just trying to learn a lot. that she has for you to make a decision this 4 4 And one question was, what repository evening. 5 5 exists where I can go and see some of the This is just my personal opinion. 6 6 history so I'm not re-inventing wheels and Probably that agenda should not have things 7 7 spinning wheels? on, "Hey, where are you at with those five 8 8 And so I'll put on my PMP hat, you know, things?" That should be a report that she 9 when I think of my RAID log where I track, you 9 sends out to you prior to the meeting so that 10 10 know, my risks, my action items, my issues and you can ask questions and whatnot, but they 11 the decisions needed. 11 aren't necessarily items that there's action 12 12 So when I look here at the agenda and I being taken on. 13 13 see engineer's report, under that I would like That's kind of the distinction I see 14 14 to see open items for the engineer, the with this agenda, is this is an action item. 15 manager's report, open items -- right? --15 One thing I would say is that with all the 16 MR. MENDENHALL: Sure. 16 districts that I deal with, I mean, I try to 17 17 MS. HESSLER GRIFFITH: -- so we can sort encourage them to have a standing rule that if 18 18 of see is it still open or do we have a something is not given out to the board at 19 resolution? So, to your point, we're not sort 19 least a week ahead of time, it's not on the 20 20 of relying on memory. agenda, no matter what. I mean, unless it's an 21 2.1 MR. CHESNEY: Yeah. Also I like the emergency or something is on fire, it should 22 short -- I like the short thing when we 22 not be on the agenda, because you need the 23 resolve it at the meeting, I mean, because I 23 time to look it over, and as well, it's an 24 go back through and look at -- you always have 24 important thing to give your community time to 25 the minutes. 25 look things over -- right? -- you know, have

24	You know, I think there is some benefit	24	MS. WHYTE: Can you all just look under

Page 41 Page 43 1 1 just uploaded that Crosscreek from our -couple days of the meeting, so --2 2 whatever that proposal that Tonja was talking MR. MAYS: That's what happened here. 3 about. It's under "Ponds" under "Dropbox." I 3 He was out here Thursday, so for him to get us 4 4 just uploaded it. It's on Greg's, so it has a proposal by Friday afternoon or Monday 5 5 to be on everybody else's. Sorry. I didn't morning was pretty good to do that. 6 6 MR. MENDENHALL: Yes. mean to disturb. 7 7 MR. MENDENHALL: No, not at all. So to MR. MAYS: And he was very competitive, 8 8 your question about the informational flyer -and his material looks better to me, so it 9 9 MR. LEWIS: I think Mr. Ross had the just kind of puts us in a situation where we 10 10 point of maybe a do's and a don'ts kind of don't want to, you know, throw the board off 11 11 of anything, but we want you to have the best thing. 12 12 MR. MENDENHALL: Right. And I know information possible, and sometimes a couple 13 13 Tonja has one of those documents. I don't of days before, you know, is as close as we know if she's gotten it to you guys yet. No? 14 14 can -- you know what I mean? -- it's as close 15 MS. WHYTE: (Moves head from side to 15 as we can get to it. We don't mean to do that 16 16 side.) last minute. 17 MR. MENDENHALL: Okay. I have seen it 17 And I am sorry. I thought this one was 18 for other districts, so it really is a matter 18 loaded on Dropbox, but that's my fault for not 19 19 of probably forwarding it on and maybe following up there. But that's why Crosscreek 20 20 tailoring it slightly to meet the specific came up. 21 needs of this district. 21 MR. MENDENHALL: Mr. Mills. 22 So I'll follow up with Tonja on that and 22 MR. MILLS: And that's really the issue, 23 23 find out, you know, and get it across to Doug, not that -- and this looks to be perhaps 24 everybody. 24 a better proposal, but until 30 seconds ago we 25 25 didn't have it. MR. LEWIS: Yes, if you could, because Page 42 Page 44 1 if we're going to make a decision about --MR. MAYS: I gotcha. 1 2 MR. MENDENHALL: It will go hand in hand 2 MR. MILLS: Right? So if we had it, 3 with this. 3 even if it was yesterday or Friday, we would 4 4 MR. LEWIS: Right. This is a good at least had some opportunity to see a third 5 5 opportunity to take advantage of it. one in there as opposed to two things going 6 6 MR. MENDENHALL: Yeah, you're absolutely back to something that Mr. Ross said about the 7 7 right. 8 8 MR. MAYS: I've got a question then. So MR. MENDENHALL: Sure. 9 how would you want to us to handle, for 9 MR. MILLS: She didn't even address 10 instance, we had the other two proposals two 10 these proposals until one of us asked her about 11 weeks ago, which were uploaded, but we got 11 it. 12 last-minute information about another company 12 MR. MENDENHALL: That's true. 13 that does the stuff, which is Crosscreek, 13 MR. MILLS: So if she was done with her 14 which just came on site Thursday afternoon. 14 part of the meeting until we said, "What about 15 So would you rather me tell him, "Sorry, 15 these other proposals?" 16 it's too late to bid it"? "Oh, yeah." So if it had been on her --16 17 MR. MENDENHALL: I think if -- I'll just 17 on the agenda, we could have followed along, 18 weigh it here, because we have this happen all 18 and it wouldn't be potentially missed 19 the time. I think if we think that's a 19 completely. Right? 20 valuable vendor that can maybe do it better, 20 MR. MAYS: Right. 2.1 cheaper, whatever the case may be, absolutely, 21 MR. MENDENHALL: Yeah. 22 get the information, get the proposal from 22 MR. MILLS: Number One. Number Two, had 23 them, but at the same time, the project or the 23 we had this ahead of time, now she's speaking 24 review of the project probably has to go to 24 to it, we're all capable to pull it up quickly 25 the next meeting, if we're within like a 25 and review it, but I had never even heard the

3	MR. MENDENHALL: Sure.	3	might be it right there.
4	MR. MILLS: She went from zero to this	4	MR. MENDENHALL: So certainly an item
5	is who I recommend we use. We're not going to	5	that we can put on the next agenda. If you
6	do business that way. Right? So I think we	6	want more time to review, as well as getting
7	can do I understand the last one	7	Tonja's summary, I will obviously defer to the

19	Once you go to Page 42, you'll start	19	fund 001 and you take a large amount of money

23	the old Westchase E Series 2007-1 is going to	23	MR. BALDWIN: It's all dependent on how
24	be paid off.	24	we work this budget, and to also go to what
25	And then for the old Westchase Series	25	Greg was saying, you know, the (inaudible) see
	Page 70		Page 72
1	2007-2 series is going to be paid off in	1	what we need to do in regards to those

3	go sorry. On Page 39, you'll see where it	3	I can't guarantee that there's going to
4	has 100 percent under the debt service column	4	be an increase, but I don't think they're
5	as being 100 percent, and then you see the	5	going to right now, it's going probably
6	other being 29 percent or around 30 percent.	6	going to decrease.
7	So 100 percent is the one being paid off	7	MR. MENDENHALL: Right. So the short
8	this year, and the 29 is to reduce the fund	8	answer is, it depends on the overall because
9	balance and reduce the amount of assessments	9	that parks line item is pretty large. So even
10	that we're going to be collecting for nest	10	if a portion of that was reduced, that's
11	year because we have to have available cash in	11 12	probably going to put everybody lower than
12	order to cover that payment and not have an	13	what they paid last year as far as
13	over-excessive amounts of excess money by the	14	assessments. In regards to the town homes, the
14	time we do pay it off next May.	15	aggregate total is actually less than what
15	MR. MENDENHALL: So in a nutshell, you	16	they were paying previously when it was one
16	don't have to assess the full amount to those	17	parcel, so and you would probably know from
17 18	folks.	18	a legal perspective now that you have 38
18	MR. CHESNEY: Right, because it's in	19	individuals paying an assessment that they
20	escrow. MP_MENDENHALL: So that's a good thing	20	weren't paying before, they probably do need
21	MR. MENDENHALL: So that's a good thing.	21	to be noticed regardless, I would think, so
22	MR. BALDWIN: I just wanted to let you know why there are negatives out there and why	22	those might be 38 letters for sure going out.
23	there were different dollar amount negatives.	23	MS. McCORMICK: Right.
24	One is going to be paid off this year and one	24	MR. BARRETT: Just so you know, there
25	is going to be paid off next year.	25	are actually no homes built there yet. It's
	is going to be paid on next year.		,

Page 77 Page 79 1 MS. HESSLER GRIFFITH: So being newer, 1 cannot go up. We can only go down. Yes. 2 2 MR. MENDENHALL: And just to piggyback if I can -- if you can help me understand, if 3 on Mr. Chesney's comments, and we kind of 3 I wanted to propose something, an investment 4 alluded to it earlier, if there is any 4 of sorts, how would I go about that? 5 5 increase at all for a particular parcel owner Am I going to take -- am I gathering the 6 or all parcel owners, whoever there is an 6 estimate? Am I asking Doug help with an 7 7 increase for based on what is submitted to the estimate? Who's --8 8 county, you have to send them a letter to let MR. MENDENHALL: That's definitely what 9 them know. 9 we have staff for. What we have done in the 10 So the long and short of that is that 10 past is folks have gotten their wish list to 11 if you're thinking of keeping the budget the 11 Doug and Sonny, and then they've coordinated 12 12 same or slightly lower or a lot lower, then it with Alan as well, so we have -- you know, 13 13 you do save yourself some expense, but at the we have estimates, that sort of thing. 14 14 same time you want to make sure you have all of At the very least, so we have discussion 15 those safety factors in as far as things that 15 points as we come to that May meeting and say, 16 16 come up, yeah, because once you set that "Hey, here are the five suggestions we have and the ballpark estimate," so we can have 17 number, you can't go up. 17 18 MR. CHESNEY: So by the May -- I will 18 some of those deeper-dive discussions. 19 19 get with Alan, and also I'll help you MS. HESSLER GRIFFITH: Okay. And then I 20 20 understand the park -- how that line item need help sort of understanding the numbers 21 affects the overall budget. 21 that go into this proposed budget, so, you 22 MR. HESSLER GRIFFITH: No, we can't do 11 So as you're going into the budget 11 that. 12 section, please keep in mind the talk that you 12 MR. LEWIS: Oh, that's right. Sorry. 13 guys had about enhancing other areas, because 13 Sorry. 14 as I -- my running group, which I do less often 14 MR. MENDENHALL: But we can absolutely 15 than I should, it takes me through the Fords, 15 set up some time. Yeah, that's no problem. 16 and a lot of the landscaping is starting to 16 MS. HESSLER GRIFFITH: Okay. But I do 17 look -- it's aged, and especially the 17 have one general question, I think, might be 18 neighborhood monuments going into the Fords. 18 a curiosity for everyone, with regard to the 19 Maybe this is the year where since 19 discounts on the assessment, so the pay early 20 you're done with the parks and you've got this 20 -- right? --2.1 big erosion bill, but you start looking at 21 MR. MENDENHALL: Yes. 22 budgeting to hire a different landscaping 22 MS. HESSLER GRIFFITH: So we have a 23 company to come in and do a nice job in some 23 pretty close to a 100 percent collection rate. 24 of those areas. Just a thought. Thank you. 24 MR. offer — because that's \$112,000 in revenue that we're giving up just to give up, so — MR, MENDENHALL: Well, the tax collector is handling your collections, so they kind of runt that and offer the discount, and obviously we gross up to make sure that if people didn't pay early, that the funds would be there for 10 pay early, that the funds would be there for 11 your operating budget. So it's a less bit less out of our 12 your operating budget. So it's a less bit less out of our 13 control as fir as what we can offer, because really the tax collector is offering. MR, HESDER GRIFFITH: The tax collector makes that decision on our behalf. MR, MENDENHALL: Yeah, well — 16 missessments, they can't say, "Okay, 11 moging to pay my CDD assessments." They have to pay the whole thing, and if they don't, then there's a tax certificate that's issued. And so it saves a lot of the district having to enforce the collection. MR. Page 89 Page 91 1 1 -- I think Brian's suggestion is a good one, entranceway, it looks worse than it looked 2 2 to have this queued up for each month before. You know, you have huge gaps of mulch 3 basically to say, "Okay, it's been a month. 3 and no plant material, no greenery, no color, 4 4 How are things looking with the projects that no nothing, and I -- you know, if I was a 5 5 we've given them? Do we have any different professional -- and I am a professional -- I'd 6 opinion on potentially renewing it," that sort 6 bust my rear end to make a customer happy, and 7 7 of things. I'm not sensing it, I don't feel it. 8 8 And that would open up the other But rather what I'm feeling is exactly 9 9 conversations. If things look bad, well, what I threw out there, that they somehow 10 10 think that we're being unreasonable or we got maybe we need to talk about setting up our 11 11 our head in the sand or we're not being budget so that if the district wants to change 12 12 understanding or something, and it's just the firms, you have those dollars available. overall situation does not sit well with me 13 13 MR. ROSS: Since we're talking 14 14 landscaping -- I don't want to get off point right at present, and, frankly, I don't see us 15 -- does Davey perceive it that they dropped 15 using Davey on specialty projects in the 16 16 future. the ball or that they somehow messed up with 17 regard to the front entranceway, or do they 17 Like we talked about some of these other 18 perceive it as the board is being unrealistic 18 communities, like Chris mentioned, with some 19 19 in its expectations? aged plant material, why would we go back to 20 20 MR. MAYS: I would say probably a little Davey if there is their responsiveness? 21 bit of both. He's not happy with some of the 21 I'm just not in tune with the situation, 22 22 plant material that he did get, but he made it to be frank, about it. 23 23 MR. MENDENHALL: Let me go to Barbara clear almost that the board could expect it to 24 look like it was expected in the pictures, but 24 real quick, and then I'll get you, Greg. 25 25 that's not what they got. MS. HESSLER GRIFFITH: So I have a Page 90 Page 92 1 curiosity, so, you know, the concern with just 1 So his excuse is, with the plant 2 2 material that was available was smaller, and the specialty projects, I know I have my 3 3 opinion community wide, and it's probably you guys have got to give time. So that's why 4 4 I say I think he's -- I think it's both ways. somewhere in line with your thoughts, but one 5 5 MR. ROSS: And just to respond, I of the things that I think is interesting is 6 6 commented last meeting that I felt like I had the disparity between, say, in my perspective, 7 7 been misled, and I would like to expand on your perspective, and the result of the audit. 8 8 So we have these landscape audits that that, because I don't think people go into 9 9 business relationships intentionally trying to we do that are consistently rated highly. So 10 10 mislead somebody. Maybe I used a bad word if I'm Davey, I'm thinking I'm doing a great 11 11 choice there. job because my audits are telling me I'm doing 12 12 I feel like that Davey, once they a great job, but yet I'm getting feedback that 13 13 realized that the promised plant material was I'm not. Right? 14 14 not available, they should have paused at that So I think there's probably an 15 point and come back to us. Instead, they 15 opportunity for us to also align the audit 16 unilaterally made a decision on what they 16 with our expectations. 17 17 thought was the best solution, and that's what MR. ROSS: I think you're raising an 18 18 led, at least in my case, to the discrepancy excellent point, and I was scratching my head 19 and expectations. 19 when I looked at the OLM review. How come 20 20 So that's where I'm coming from. And I they didn't pick up with the problem with the 21 21 front end? It's like, are they looking at the don't want to make a big deal of it or 22 anything like that, but in my larger picture, 22 same stuff I'm looking at? 23 23 So I think there's merit to what you're I don't see that they're really being very 24 24 interested or responsive to the situation. saying, but I do see that as a different 25 25 Right now, if you drive by that front issue, that may be true that OLM is

Page 93 Page 95 1 1 MS. HESSLER GRIFFITH: Okay. And based contributing to misunderstood expectations or 2 2 something like this, but the difference in upon the fact that we've had previous 3 3 proposals, does that help expedite the RFP if this case was, on this specialty project, they 4 came in -- I don't think you were yet on the 4 we essentially send out RFP to folks who have 5 5 board -- they made a special presentation to already proposed? 6 6 MR. MENDENHALL: Well, the short answer 7 7 They passed out graphics and pictures. is yes. I mean, there's a limited pool of 8 8 folks --Mr. Mills was very explicit in the purpose and 9 9 the timing of this. I felt like they made MS. HESSLER GRIFFITH: Right. 10 10 MR. MENDENHALL: -- that can handle a promises to, yeah, they could achieve those 11 11 things, and it just was, in my view, a flatcommunity of this scope. 12 12 MS. HESSLER GRIFFITH: Right. Okay. out disaster. 13 13 And I used the word last time, I felt MR. MENDENHALL: So, I mean, I can guess 14 14 misled. I realize I need to temper that a offhand because I know the folks that are in 15 little bit, but I just see that as a very 15 the industry. So it is a limited pool. 16 16 As far as your specifications, generally different issue. 17 MR. MENDENHALL: And just to at least 17 speaking, they are, you know, a living 18 make the delineation, when OLM reviews, 18 document, but we have done this three or four 19 generally speaking, they're reviewing for 19 times now, so we've captured, as we have gone 20 20 maintenance performance. So when you do a along and there are different iterations, new 21 special project like this and they look at 21 things that are wanted or things that were 22 22 that special project and they see there's missed, so you have a pretty good set of 23 23 weeds or the plant material isn't thriving, documents. 24 they might mark that; but if it doesn't meet 24 So would it be relatively quick? 25 25 Generally speaking, it can move pretty the pictures that we saw, they aren't going to Page 94 Page 96 1 1 necessarily grade on that, because it's just quickly, but the reality is, there are just 2 2 not part of their review. these procedural steps that you have to go 3 3 So when you'll see the OLM come into through, especially with you guys only being 4 4 play, for example, last year we had some able to meet in the sunshine, it starts 5 5 issues with flowers at the end of some of the putting months between the process. 6 6 curbs and some weeds, and so those show up on So that's kind of what really drives the 7 7 the report, because they're regular time line of it. Yes, sir. 8 8 maintenance items, and OLM will actually MR. ROSS: I feel, Andy, that your 9 9 report on them, and then the expectation is comments actually give greater weight to the 10 10 that Davey fixes it by the next cycle of the comments that Ms. Griffith made, that she was 11 11 report. suggesting that part of the issue may be we 12 12 So to Mr. Ross' point, they come in and might have a disconnect between OLM and Davey 13 13 gave a presentation, they show a picture, you and whether it's in communication or setting 14 paid dollars specifically for what you were 14 expectations, et cetera. You were narrowing 15 15 presented, and I don't think that that was the scope of what OLM does. 16 16 met. MR. MENDENHALL: Sure. 17 17 MS. HESSLER GRIFFITH: Does it make MR. ROSS: But think of some of the 18 sense to have OLM present when we're 18 things that have happened in the time I've 19 19 evaluating landscaping vendors? been on this board. We have heard numerous 20 20 MR. CHESNEY: They usually do it for us. times people talking about the shrinking 21 21 MS. HESSLER GRIFFITH: They usually do flower beds. I've heard it many, many times, 22 22 what for us? and I could make the argument, isn't that 23 23 MR. CHESNEY: They submit specs, and something that OLM should have been on top of? 24 24 MR. MENDENHALL: And I would say yes. they solicit the proposals, and they provide a 25 recommendation. 25 MR. ROSS: And I think that that makes

Page 97 Page 99 1 1 her point almost, that maybe it's time to go value to extending a contract within three 2 2 back and at some point have a refresh with years, an additional year with no inflationary 3 OLM as to what our expectations are. Maybe 3 increase, especially given the current labor 4 4 give them the specs of the property and make market and the current, you know, market for 5 5 sure they're not just covering maintenance, landscaping services has a certain value to 6 but that, yeah, we're getting what we're 6 it, and I would not wait too long to make that 7 7 paying for. choice. 8 8 MR. MENDENHALL: And that's a very good I'm not going to go ahead and make a 9 9 point. And I think with any of these projects motion to accept it. I understand that. But 10 that you have, you know, if you have an 10 I think -- and I agree with both of you as far 11 entrance beautification, it is certainly 11 as, you know, their performance in that area, 12 12 relevant to kind of pull OLM in and say, "Hey, but maybe that is something that you break off 13 13 look" -- even have them sit in in the meeting and take, like Mr. Barrett's suggestion, maybe 14 14 and say, "Here's what we're expecting to get. do it differently in the future. 15 15 We want you to do the double-check on that." MR. MENDENHALL: Okay. 16 16 MS. McCORMICK: Related to Davey, too --Now, I'm just speculating that they 17 might say, "Well, that's kind of outside the 17 are you, on your report, going to be talking 18 our scope of regular contract, so we'll do it 18 about the property enhancement addendum to the 19 19 for X dollars." They'll project manage it, so landscape maintenance contract with the 20 20 to speak. increased amounts for --21 It might be worth it for them to do 21 MR. MAYS: I wasn't planning on it since 22 that. Or it might be something that you 22 it was --23 23 MS. WHYTE: That was approved. negotiate with them and say, "Look, it's part 24 of your contract. We expect that you do that. 24 MR. CHESNEY: Yeah. 25 25 You know, these projects only come up once or MS. McCORMICK: Okay. So we just need Page 98 Page 100 1 1 twice a year, and it should be within your to write -- I just need to write an addendum 2 2 normal routine." then that adds this into the dollar amount of 3 3 So I think it's a very good point that the landscaping maintenance contract. 4 4 you both bring up, and it's something to look MR. CHESNEY: Eighty seven or eighty 5 5 at as we get these projects that come up, nine hundred, something like that. 6 6 because, you know -- and I've seen this in MS. McCORMICK: Yeah, eighty nine. 7 7 many districts, including my own, when you MR. MENDENHALL: I pulled you out of 8 8 your attorney report to go back to Davey. Did leave a project design like that 9 implementation up to the landscaper, you know, 9 you have anything else? 10 10 they have different eyes than you, because you MS. McCORMICK: Other than that, we've 11 are driving through it every day, and you get 11 got the contract now for Triangle Pool 12 12 feedback from your residents and that sort of Services finalized. 13 13 thing, so, you know, obviously there can be I know that the proposal amount ended up 14 14 that disconnect. changing because it's not only for the splash 15 MR. I mean, 10 update on what's going on in the medians out 11 that's -- am I missing anything? 11 there. 12 MR. MENDENHALL: Yeah. No. And even if 12 I'm not sure -- I'm sure you have -- if 13 13 at some point you, as a board, decide that you you came from the west to eastbound on 14 14 do want to move forward, then, as Erin Linebaugh Avenue, you'll notice that they're 15 mentioned, you have 60 days if something goes 15 doing a little cutout -- what they did, first 16 16 sideways or you suddenly become unhappy, that of all, though, is they bypassed our 17 you can get out of it within 60 days. 17 irrigation zone. 18 MR. CHESNEY: Yeah, that's true. We can 18 And the reason they bypassed those two 19 19 extend it right now and then go three, five -- there's three of them, three fifty-foot 20 20 months down the road and give them 60 days' sections, fifty, a hundred-foot sections --21 notice, and then we can get out of the 21 and what they're doing is -- what they had to 22 contract and put it up for RFP. 22 do is they basically moved the irrigation over 23 23 so that they can cut out -- so they're cutting MS. HESSLER GRIFFITH: Doug, is there a 24 time of year that is better to change 24 it out for us -- remember we talked about the 25 25 providers? bike lane being pulled up and maybe having one Page 106 Page 108 1 1 MR. MAYS: Oh, yeah. Yeah. lane of traffic. 2 2 MS. HESSLER GRIFFITH: What time of year Well, their plan is not to do that. 3 3 is best to make that change? Their plan is to do these cutouts and deviate 4 4 MR. MAYS: Probably the wintertime, traffic around so you've still got two lanes 5 5 yeah, because you don't want to do it right in going around it. And then what they're doing 6 6 the summertime when you're staffing up and is, they're not cutting the whole bicycle lane 7 7 things are starting to grow makes it up. They've got three, four points where they 8 8 difficult, so -will be digging the bike lane and pulling the 9 9 pipe through -- or pushing the pipe through. MR. MENDENHALL: More of a risk. 10 10 So they don't have to dig up the whole MR. MAYS: More of a fall to wintertime 11 bike lane after all. They're just digging up 11 when they cut their staff when the growth is 12 12 their -- I think it's four sections so that not so heavy. 13 they can pull their pipe through, and then 13 MS. HESSLER GRIFFITH: Okay. 14 they will repave only the bike lane back 14 MR. MENDENHALL: Okay. Oh. Sorry. 15 itself, and then they will repatch -- patch up 15 MS. McCORMICK: I was just going to say. 16 the side of the road back, putting our 16 We have actually the ability to terminate on 17 irrigation back, and putting our St. Augustine 17 30 days' notice, but we would have to go 18 sod back. 18 through the RFP process. So from a practical 19 MR. CHESNEY: Is the water currently 19 standpoint, you're right. 20 off? 20 MR. MAYS: Plus, you can spend a lot of 21 MR. MAYS: No. It looks like it out 21 money to RFP it, too. OLM is not free. 22 there today, though, didn't it? 22 You've got to advertise it. There's a cost 23 MR. CHESNEY: Yeah. 23 involved --24 MR. They always 5 5 -- when we start talking about ripping out intended to take that cutout to the drugstore б portion of our boulevard, I think that's 6 away, and they always intended to run at least 7 7 sacred to our community. two, three hundred feet to increase that left 8 8 So for one resident to call up and turn capacity. 9 9 express a concern and they come out and MS. WHYTE: You're correct. And they're 10 they're just -- you know, I think that maybe 10 going to leave the turning lane into CVS 11 11 we should have some opportunity to -because they got a lot -- they got a lot of 12 12 MS. WHYTE: Keep in mind that boulevard feedback from CVS, and it wasn't positive, 13 13 is not ours. That is actually county-owned so --14 14 property. We just have a maintenance MR. WHYTE: So whether or not we do or discussion yesterday. 20 20 we don't, I don't know. As he indicated, MR. RAGUSA: Well, my suggestion to the 21 there is no funding for it. It could be five 21 CDD supervisors then, you, as a matter of 22 22 years out before that funding actually policy, oppose the effort to examine or 23 23 applies. So it is strictly in the preliminary consider significantly increasing the turning 24 stages at this point. 24 lane, you should take the unified position and 25 25 approach at least Commissioner Murman, if not MS. McCORMICK: I mean, I would think Page 114 Page 116 1 1 that the county is being responsive to what it the entire Hillsborough Commission, because 2 2 believes that the residents in this area want, you're right. 3 3 so I think that's probably a big driver of why It seems as though our commissioner --4 4 they're looking at this. our commissioner, the Westchase commissioner, 5 5 is much more responsive now than would MS. HESSLER GRIFFITH: Okay. All right. 6 6 I think that, though -- I'm concerned that, historically seem in the past. But you're 7 7 you know, a resident called; they're looking right. One resident, while it's important to 8 8 at it purely from a traffic perspective -respond to that resident, it should not 9 right? -- and, sure, with traffic flow, but, 9 overweigh the desires of the community. 10 you know, I want to make sure that they're 10 MS. HESSLER GRIFFITH: Thank you. And I 11 sort of weighing --11 guess that's where I was kind of going. Where 12 MR. Page 117 Page 119 1 1 portions of land and add turn lanes and then center, which have now become seating areas 2 2 undo it. So I would rather us decide what is for the restaurants. 3 our position and be prepared to have those 3 So I'm going to, you know, talk to code 4 conversations. 4 enforcement or the county about that. But I 5 5 So I know we're relying on Sonny as sort would like to see a sidewalk from Bentley Way 6 6 of the gatekeeper, but I think Sonny also, you up past Westchase Town Center, down to 7 7 know, could probably benefit from some Sheldon, a public sidewalk for everybody, 8 8 wheelchairs, strollers, runners, walkers, direction from the board when she's having 9 9 these conversations to know what, you know, everybody. And the bus stop is on that 10 10 our position is, so -corner, too, so --11 11 MR. MENDENHALL: Mr. Barrett. MR. MENDENHALL: Well, a very valid 12 12 point. So, I mean, anytime these sort of MR. BARRETT: I think the last time I 13 13 items come up, much like this particular one looked at the permit for developing land, it 14 14 today, you as a board certainly can decide did require a public sidewalk, and for them to 15 whether you want to weigh in an opinion or 15 build one, and I think you're referring to --16 16 take an approach, and then obviously legal it's covered with now -- you're right -- it's 17 counsel will tell you what your limitations 17 covered with all sorts of chairs. It's not a 18 are and what you can do, whether it's actually 18 sidewalk. 19 19 if you have a strong position, or whether you MS. HESSLER GRIFFITH: How much is your Okay. I'm here again. I was invited 17 back by the board to -- when I came last time, 17 assessment? 18 I brought a lot of papers from the county and 18 MS. CARTER: \$28,000 are the CDD fees, 19 19 so forth on the tax issue and so forth. The and the county taxes are \$10,000. 20 20 problem that I'm having is the property that I Andy and I were going over earlier some 21 have is a small property, and the CDD fees 21 of the features in this Fishkind report, and just continually go up and up, and it's really 22 22 it clearly states on a good many of the 23 23 strapping that property to pay that high of categories that nonresidential properties, 24 CDD fees. 24 including the golf course, are allocated based 25 25 So last time I came, I was requesting a on a portion of the costs based on the number Page 126 Page 128 1 1 reduction in CDD fees, because at least an of acres in use. And that's the same for a 2 2 acre or more of that property is wetlands number of categories. 3 property, which adjoins the wetlands 3 MR. CHESNEY: Well, it's also the number 4 4 properties on the north side, which is owned of trips. 5 5 by the CDD, and then the offices and the MS. CARTER: I'm sorry? 6 6 office spaces and so forth. MR. CHESNEY: The number of trips, so 7 7 I'm sure you're -- is everybody familiar the number of people going to that property in 8 8 with where it is? Okay. Anyway, so I was a given day, so --9 going to ask to reduce our size, because that 9 MS. CARTER: Yeah, some of the 10 10 wetlands is a drainage for the area, not just categories is based on trips. 11 11 MR. CHESNEY: It's combination of them, from my property, but for the whole area. 12 12 But then when I did more looking into so --13 13 it, I found out that that's not necessarily MS. CARTER: Yes. 14 14 the case, because it doesn't really seem to MR. CHESNEY: -- if you have a larger 15 matter what size you are and how many acres 15 property in a certain class, so the class is 16 that you have, although it should, according 16 the first indicator of the taxing, so the 17 17 to the Fishkind study, because in a number of number of trips, that's the best thing. 18 18 categories, it's based on acreage for So like something big like a golf 19 commercial properties. 19 courses still only has 18 holes, four people, 2.0 20 But when you come to budget, which he they actually have a relatively low number of 21 sent me a copy of the budget and I reviewed it 21 trips given their acreage. 22 fairly thoroughly, every commercial property 22 MS. CARTER: Right. 23 is taxed exactly the same. If you have nine 23 MR. CHESNEY: You know, a fast food 24 24 restaurant in the trip manual -- it's not just acres or if you have ten acres or if you have 25 one acre, you're taxed the same amount; and 25 the guy doesn't just come up with it -- in the

Page 129 Page 131 1 1 trip manual, they have like a set number of So your classification --2 2 trips per size parcel. MS. CARTER: All based on trips? 3 So a fast food restaurant has a certain 3 MR. CHESNEY: Yeah, it's all based on 4 4 category that's done. trips, so --5 5 MS. CARTER: Yeah. Isn't it the case MS. CARTER: Well, then every single 6 that the trips -- the trips are on some of the 6 parcel should not have the exact same CDD fee 7 7 categories, but the acres is on some of the -- right? -- even if it's based on trips. 8 8 categories? MR. CHESNEY: I would be surprised that 9 MR. CHESNEY: No. It's all based on 9 it does, I mean, because, you know, you pay 10 10 28,000, CVS doesn't or Applebee's doesn't. I trips for commercial. 11 MS. CARTER: Oh. So actually we don't 11 know Publix doesn't. So I know they all pay 12 12 really go by what this study says. different amounts. So I'm not sure what you 13 13 MR. CHESNEY: Well, I haven't read that mean --14 14 in a number of years, but that should be what MS. CARTER: They pay the exact amount 15 that says. I'd be happy -- I was unprepared 15 according to the budget. Let's see here, and for this. I didn't know -- I thought you had 16 16 I'll show you what I've got. 17 talked with someone from Fishkind on how they 17 MR. BARRETT: Some copies of the budget, 18 did it, or I don't know who you talked to. 18 Ms. Carter, have a base number that you have 19 19 But I guess the long and the short of to then multiply by a unit multiplier, which 20 20 it is that if we change it, we can't change it is another --21 just for one person, the methodology. We pick 21 MS. CARTER: Uh-huh. What constitutes a 22 a methodology based on how we treat all the 22 unit? 23 23 MR. BARRETT: I don't know. commercial properties, and so that's how all 24 the commercial properties are treated. 24 MR. MENDENHALL: Yeah, and that's in the 25 25 They're all treated the same, based on Fishkind methodology. I can't tell you Page 130 Page 132 1 1 that trip manual and the size, and we hire exactly where -- I don't have it in front of 2 Fishkind to actually come up with what those 2 me. But Chris is correct. So, just as an 3 3 individual percentages are. example, Burger King, your --4 4 MS. CARTER: Uh-huh. Well, then, I MS. CARTER: Yeah. That's one of my 5 guess --5 guestions. What constitutes a unit? 6 MR. CHESNEY: So unlike a valuation, 6 MR. MENDENHALL: -- your unit would be 7 7 like if you go to your tax collector and say, 1.69, so it would be --8 8 "Hey, you know, you are saying this is worth MS. CARTER: That's acre. They're going 9 \$200,000 and it's not. It's really worth 9 by the acreage calculation then. 10 10 \$100,000. I needs my taxes changed." Well, MR. MENDENHALL: Okay. So it would be 11 we don't have that authority, because the way 11 that number multiplied by what the general 12 12 we've done it from the beginning is just based fund assessment is for commercial. I have the 13 13 on what that property is, what the usage of old budget. I'm looking actually at 2016. So 14 14 that property is, and then to a lesser extent, in that particular case --15 what the size is, so --15 MS. CARTER: Okay. One point -- okay. 16 MS. CARTER: Okay. I guess I'm confused 16 That's --17 17 then, because some of the categories are based MR. MENDENHALL: It was 14,000, and you 18 18 on the trip evaluation, the trip method, would multiply that by 1.69. So there is some 19 according to this, but maybe you're not going 19 differentiation between the different 20 20 by this. I don't know. And some of them are commercial parcels, you know, based on what 2.1 based on acres. 21 their unit count is. There would be some 22 MR. CHESNEY: Well, it might be because 22 slight differences. But number that's used as 23 they were not developed at the time. Like I 23 the multiplier is what's the same. MR. CHESNEY: Yeah. 24 24 said, it's been awhile since I've looked at 25 that, but in general, it's all based on trips. 25 MS. CARTER: So -- okay. Then maybe

MENDENHALL: I don't know, because you don't currently use them, so MS. WHYTE: Oh. It was to do with the water quality. Tonja that's what it was. Tonja suggested that we get our water quality tested in a number of our lakes just to see where we're at, due to the fact that we have had some issues with plant material taking and stuff like this. So she just wanted to suggest that we might want to consider doing some water	8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	we're trying to do and achieve. It just seemed like, oh, okay, let's call somebody to do some water checking, and if that's the case, then A & B must not be doing their job. MR. MAYS: No. I know there was a good reason behind it. I just don't remember MR. ROSS: I'll drop it. MR. MENDENHALL: I can reach out to Tonja and have her email back some of the answers to those questions, and that way, we get it out to the board and MR. ROSS: Well, just to some import, she didn't raise it during her report, so maybe she decided it was a waste of time, and I'm not giving her the credit for recognizing it is a waste of time, but, yeah MR. Right? 2 nighttime kiosks, too. 3 And they scan it, and the gate opens, and then 3 MS. WHYTE: Oh, God, no, don't start --4 4 you come. So there's just a lot of MR. CHESNEY: I like how he leaves, and 5 5 now he's like let's do -functionality and a lot of --6 6 MR. RAGUSA: The CDD looked at a MS. WHYTE: There's a lot of pros and 7 7 cons to it. I mean, you can continuously add nighttime kiosk for the Greens. That's the 8 8 things to this program. You can do -- you biggest single subject we've ever had in this 9 know, when a resident comes in and does not 9 community. There were hundreds of people 10 10 have anything, or a guest, and you can take lined up out the door. 11 11 To tell you the truth, they got bad the driver's license legally. I'm not sure 12 12 information from residents that was absolutely what you can and cannot do. But it's an 13 13 option. false. 14 14 MR. Only certain 16 MR. RAGUSA: Correct. We had hundreds 17 17 of people that wanted to speak, and it was things you're allowed to record. 18 And, I mean, there are so many things on 18 like, "Folks, save your breath. You got bad 19 this program that are phenomenal, and it will 19 info. Someone wasted your time." 20 20 expedite the entry, and the residents have MR. CHESNEY: I was saying it out there. 21 21 their own accountability and their own -- you I couldn't get in. 22 know, because a lot of times residents forget. 22 MS. WHYTE: So as a board, the 23 If you're living there, you just 23 collective board, do we need -- do you need to 24 24 vote on something like this? What's the presume, tell us -- your gate information 25 sheet is updated or it's up to date, and then 25 process?

Third Order of Business

I have attached a couple of historical emails to refresh the information for everyone, including 1) an email regarding general erosion issues and the changing repair options and costs and 2) an email regarding the pond inspection performed by Doug and I and thoughts on aquatic plants and the overlapping services between the landscape maintenance company and the lake management company along the pond perimeters. As well as, information regarding the prioritizing of a few erosion repairs that are beginning to encroach onto private property with no drainage easements is attached. Proposals for this prioritized restoration work are also attached, which we are prepared to discuss at the Board meeting so that a decision can be made to get this work scheduled to make the most efficient repairs before the rainy season when water levels rise. Keep in mind that, in an attempt to restore slopes for a less expensive cost, the vendors who submitted proposals are all new, and we will be experimenting with their products and installing aquatic plants along them to try to achieve long-term slope stabilization. We have made, and continue to make, progress in regard the selection of the right aquatic plant material and its planting location to assure a successful planting program. Doug, Sonny, and I have also been discussing the torpedo grass treatment options/alternatives to attempt to come up with a plan that will better protect the aquatic plants so that they more successfully stabilize the slopes.

I have also attached the approved erosion repair proposal for the work in the Greens as a reminder of the scope and cost of that work which is currently being completed. This method is a purely mechanical permanent repair like the repairs done along Montague/Stockbridge/Lightner Bridge last year.

Now, we are initiating the next phase of trying to preserve the remaining ponds' existing slope condition so that erosion will not continue over time. A pond slope planting guide is attached for your review and discussion at the next Board meeting. Doug, Sonny, and I have been discussing various plant material options and we will recommend a planting scheme for Ponds 49, 59, and 61 to include a combination of bermuda grass, Blue Flag Iris, and club/spikerush. As well, we will experiment with a "No Mow/Weedeat" zone along the bottom of the grass line to help get deeper root systems in this area. We will also start preparing educational information for the residents' and allow them to observe the conditions and attend meetings with any questions and/or concerns.

Thanks.

Guide to Selection and Installation of Stormwater Pond Plants

Gail Hansen, Shangchun Hu UF/IFAS Environmental Horticulture Department Center for Landscape Conservation and Ecology

Plant Selection

Selecting aquatic and shoreline plants for stormwater ponds is more challenging than selecting plants for a typical landscape. The site conditions can vary greatly and are more difficult

to control. Water depth can fluctuate widely over the year and create wet and dry conditions that the plants must be able to tolerate. The water quality can also vary with rainfall and fertilizer inputs and steep slopes can make plant establishment difficult.

The concept of using the right plant in the right place is important in the shoreline environment because the shoreline includes a variety of conditions including a dry slope, a littoral shelf, and deeper water areas. Selecting the right plant requires knowledge of plants, including function, aesthetics, and environmental/growing requirements and knowledge of site characteristics. Three questions to ask about plants are:

- 1. Aesthetically: what do you want the plant to look like?
- 2. Functionally: what do you want the plant to do?
- 3. Environmentally: what conditions does the plant need to grow?

Aesthetics

There are common plant characteristics that are generally considered to have aesthetic value. Most people enjoy a variety of color, texture, and forms in plant material. Aesthetic characteristics describe the look of the plant and can be used to create a pleasing composition that enhances the aquatic habitat. Aesthetics also refers to the organization of plants in the landscape through repetition of plants and color, form, or texture at specific locations in the landscape to create a recognizable pattern.

Color- Color is usually the most attractive visual characteristic of plants, but it also is the most fleeting, as most plants only display prominent color during short bloom periods. Light qualities of the site--sunny or shady areasaffect the perception of color. Warm colors such as white, yellow, orange, and red show up more in aquatic and shady environments because they contrast with the darker blues, greens, and browns of water and foliage. Cool colors such as blues and dark purples are less noticeable because they tend to blend with greens. Including a variety of greens in the aquatic plants will create interest year-around.

Texture- Textures are typically described as coarse (large, broad leaves and big stems) medium (average leaves and stems), or fine (tiny leaves, thin stems). Texture can provide contrast and interest, particularly when there is a lack of variety in color. Texture is the most variable quality of a plant- it can change with the seasons when plants lose their foliage, and it can change with viewing distance. Stormwater ponds are often viewed from a distance so bold textured plants with large, broad leaves and big flowers show better. Use a fine textured plant, such as a grass, to contrast with the bold texture and provide more interest.

Form—Growth habit or form, is the most recognizable quality of a plant. Choose the plant form most appropriate for the desired function. It is important to remember that plant change over time as they grow. Form also helps determine if plant material should be used in masses or as individual specimens. In large open areas such as ponds large upright plants with well defined leaves that grow in large clumps are often preferred. Floating plants with broad flat leaves, such as water lilies, work well as long as they don't spread and cover the entire pond surface.

Size- It is important to consider the size of the plant when it is fully mature. Tall plants can sometimes block views when they are mature so consider height as well as spread. The slope to the water affects the visual height of the plant depending on the location of the plant on the slope. Tall plants at the top of the slope will block the view of the water so locate low growing plants at the top of slope and taller plants at the bottom.

Function

When choosing plants for a particular site, consider the Function of the plants. Functional characteristics include density of foliage to block views, density of root mass to prevent erosion, and ability to take up nutrients and pollutants to improve water quality.

Erosion control - Trees in the water at the pond edge can help control erosion by breaking up the wind and wave action that contributes to shore erosion. Large trees that do well in wet conditions include: Red Maple (Acer rubrum), Loblolly Bay (Gordonia lasianthus), and Bald Cypress (Taxodium spp.). Strongly rooted emergent plants also help prevent erosion. Emergent plants include: Bulrush (Scirpus spp.), Spike Rush (Eleocharis app.), Pickerel weed (Ponterderia cordata), and Duck Potato

Growing Conditions

A site inventory and analysis will guide plant choices by noting environmental conditions in the pond and on the shoreline. Conditions that affect plants in aquatic habitats include water depth, fluctuating water levels,

foraging fish, soil structure, the slope of the littoral shelf, and light availability. Conditions that affect landside plants include bank slope and soil structure.

Water Depth

Water depth must be considered when choosing plants because wetland plants grow in three different groups or zones with varying water depths. Emergent wetland plants are rooted in the soil in the shallow water of the upper littoral zone with the upper portion of the plant out of the water. Emergent wetland plants are further divided into short-stemmed marginal plants that do well in wet mud or sand and marginal plants that grow on the bank and prefer changing water levels. Submerged plants grow entirely underwater and are typically located in the lower littoral zone where the water is deepest. The floating wetland plants have roots that dangle and are rooted in the pond bottom in the middle littoral zone. Creating deeper areas by excavation can help expand the size of planted areas.

Fluctuating Water Levels

Ponds that have fluctuating water levels present a challenge when selecting plants. The plants need to thrive in both wet and dry conditions, sometimes for extended periods. Emergent plants that are more tolerant of drawdowns (exposed pond soil) include: Pickerel-weed, (Pontederia spp.), Duck Potato (Sagittaria lancifolia), Bulrush (Scirpus spp.), Golden Canna (Canna flaccida), Spike Rush (Eleocharis sp.) and Blue Flag Iris (Iris virginica).

Controlling Grass Carp

Although Grass carp (sterile triploid) are sometimes used for biological control of aquatic vegetation they can present problems with new plantings. Grass carp prefer submersed plants, but they also browse on the tips of young tender emergent plants. To prevent loss of new plants install a barricade around the plants, such as four wire fencing or plastic net fencing from the pond bottom to the top of the water until the plants are larger and less tender.

Soil Structure

Soil (substrate) conditions are important for plant growth. Rocky bottoms in the pond are too hard for plant roots to penetrate and muck soil is too soft and unstable to anchor plants. Sandy soil with some organic matter (between rocks and muck) is usually best. Too much organic matter can create high levels of acids, methane, ethylene, and alcohols which are toxic to plants.

Slope of Littoral Shelf

Steep slopes, that create changes in water levels and growing conditions make establishment more difficult. It is important to determine the average water level along the shoreline on a yearly basis because many plants will die if they are too wet or too dry for long periods. Manipulating the depth and slope is one of the best ways to encourage plant growth. Littoral zone size often increases as the pond gets older because increased sedimentation and water movement decreases the depth of the lake.

Slope of Pond Bank

The slope of the bank leading to the waters edge can present challenges for the establishment of the no-mow or no-maintenance zone. Several techniques can be used to prevent erosion and capture irrigation water for the slope plants. Installing mini-baffles (short lengths of plastic edging or landscape timbers) on the downhill side of plants will hold water and keep soil from eroding. Porous landscape fabric such as burlap or jute will also trap sediment and water. Rip rap made from stone, concrete rubble or pavers can help slow water runoff and creating swales and berms along the bank will intercept water and allow it to percolate.

Light Availability

Light availability is the most important factor in plant growth and is primarily determined by water clarity and depth. Water clarity is determined by organic color and suspended particles, both organic and inorganic. Bottom feeding fish such as carp and catfish can increase suspended sediment which blocks light and may limit plant growth. Slowing surface runoff with plant buffers and no-mow zones and using rip-rap at drain discharge areas will help decrease turbidity caused by water movement. Nutrient levels in ponds, both from soil and human-caused, can affect light availability by increasing algal growth which decreases water clarity. Reducing algae growth will increase light available to plants.

Shoreline Plant Installation

1. Shoreline preparation

Remove undesirable plant species in the shoreline area. Remove roots of undesirable species to prevent regrowth.

Determine the average shoreline water level on a yearly basis. This is especially important because water levels may vary dramatically that making plants harder to survive if they are kept too wet or too dry for extended periods.

Measure maximum water depth in areas to be planted. These measurements will assist in deciding the numbers and types of plants you need and the boundaries in which to plant them.

Consider increasing the size of planting zones. Deepening the margins around the edge of a pond can help prevent undesirable plants, such as non-native torpedo grass, from invading into the water.

Develop a detailed planting plan that includes types and numbers of plants needed. The accuracy and detail of your measurements will play a key role in the planting plan. A detailed plan will increase efficiency during planting and promote plant survival.

Note that stormwater ponds are planned and permitted according to Florida Department of Environmental Protection or local Water Management District criteria, and proper approvals must be obtained prior to modifying these types of ponds. Counties and local governments may also have guidelines or policies on stormwater ponds. It is advisable to contact the county public works office to ensure planting plans are permissible.

2. Shoreline plant installation

When to Plant. Perennials and grasses should be planted during peak growing season (in mid-to-late summer) to allow enough time for their root systems to become established before they go dormant in the late fall. Trees and shrubs should be planted in spring and fall when there is adequate rainfall to help them develop strong roots and leafy growth.

Handle wetland plants with care during planting. Plants should be wrapped in wet newspaper to avoid injury and drying. Do not place plants in the trunk of a car or in the back of a truck where they will overheat. When planting, start with plants in the deep water zones and work up the banks. Planting should be conducted in the early morning or late afternoon to avoid the hot midday sun.

Where to Plant. If possible, locate aquatic plants 2 or 3 feet from the planted bank or plant low-growing plants. The gap between the aquatic plants and the shore plants will prevent accidental trimming of aquatic plants with the weed trimmer when maintaining the shore plants on the bank.

Plant in clumps. Planting like species in clumps creates attractive concentrations of color and provides more varied habitat features. Three or four plants of the same species should be installed in the same hole and they will expand into a cluster of plants. Installing plants in clusters will increase survivability of shoreline plants, facilitate management of weeds, and minimize colonization of unwanted plants.

3. Maintenance after installation

Routine maintenance is needed during the initial stage after the installation of plants to allow expansion of the desirable plants and control the growth of invasive species. Desirable native species do not require fertilizers or spray.

Generally, maintenance requirements are minimal after the plantings become established. Herbicides may be needed if undesirable the plants become established after the first year when wetland plants are better established. Only herbicides that are registered specifically for use in wetlands by the U.S. Environmental Protection Agency and the Florida Depart-

I offer the following for clarification:

- 1. Stormwater pond slope erosion is common due to the historical seasonal water level fluctuation over time, as well as, illicit discharges. I would consider this type of work standard maintenance. Sine these types of erosion are not, typically, a result of failed soils, either natural and/or backfilled, we do not solicit special engineering services to address them. Of course, there can be extenuating circumstances that would require testing and special evaluation, and we would let the Board know if this was ever the case in dealing with any erosion problems within the District.
- 2. In the past, I have discussed the various erosion repair options with the Board, and, of course, some miscellaneous repairs have been made. Those options were the best/most economical options available at the time.
- 3. We also have discussed the importance of aquatic planting for slope stabilization for many years, since it is the most economical method in stabilizing pond slopes, and aquatic plantings were planted after erosion repairs were made a few years ago in an effort to stabilize the repair work done, but the plantings failed.
- 4. The erosion repair products are ever changing/evolving, and we try to keep up with them when evaluating/considering repair specifications. So, the newest non-aquatic planting repair is the Flexamat which has worked well thus far. Keep in mind that we haven't experienced significant decline in pond water levels since these repairs were made, so the product has not been completing tested at this point.
- 5. The information that I provided the Board a couple of months ago regarding anticipated costs for future erosion repair was a simple mathematical equation for a point of discussion and awareness. I multiplied the length of pond slope with the varying costs (\$1 per I.f. for plantings, \$50 per I.f. for concrete rubble, and \$110 per I.f. for flexamat. We have not formally assessed the ponds which would typically be done in the spring, but we have recently observed some erosion issues that are worthy of discussing since they may be occurring in easements in homeowners back yard versus in a larger CDD owned tract of land containing the pond maintenance berm. I also understand from Doug that the clubrush plantings are doing acceptably, and the Board may choose to pursue more extensive planting program, where appropriate, with a resident education program, instead of spending a lot more money on the mechanical repairs.

Please let me know if you need additional information or have questions.

Thanks.

Hi Tonja,

We had some discussion last night on whether there are geo-technical needs related to the erosion issues. Can you clarify the engineering needs related to the erosion issues?

Thanks Andy

I offer the following information:

- 1. Doug and I visited multiple ponds in various parts of the community with the following goals in mind:
 - a. We estimated property corner locations to observe how much land the CDD owned along the pond slopes. We wanted to discuss whether or not restoring slopes was necessary to make effective repairs. As you can see in the photos with Doug, even in the Greens where we have drainage easements for the maintenance berms on private property, we have a wide space remaining in CDD ownership. Please not that most ponds also contain trees within this area which will be discussed further below.
 - b. We wanted to observe the lake management treatment along the slope and further discuss methods treatment schedules with our environmental professionals to follow up with the lake management company.
 - c. We wanted to observe the current condition of the various aquatic planting and see how well they were stabilizing the slopes. The goal is to achieve a successful aquatic planting program with the appropriate plant material in the appropriate location.

You can see in one of the attachments, in general, we have more than 10 feet of CDD owned pond berm/slope along in most ponds which should give us some flexibility in regrading and stabilizing eroded slopes instead of backfilling and re-constructing the originally constructed pond slope. There are exceptions to this generalization which will be discussed further below.

I further reviewed a current aerial of the community to determine locations where CDD owned lands are narrower to get an idea of how many areas would need backfilling and slope construction to stay out of the abutting private property.

- 2. One of the attachments contains a picture of some aquatic plants and evidence of the current weed control along a pond slope. You'll see a lot of browning of the weed material. We discussed this with one of our environmental professionals and Doug will be developing a modification to the lake management's current treatment program so that treatment occurs more often before the weeds/undesirable grasses grows into the desirable aquatic plants.
- 3. Another attachment contains a few pictures of various aquatic plants, ferns, arrowhead, clubrush type grass, and canna. We discussed various plants with our environmental professional and he has sent a list of his recommendations. We also discussed the nuisance apple snail issue, and we all agreed that diversity would be key, in case of a snail infestation. The good news is that it seems that only I have experienced serious problem with the apple snail, so we're hoping it won't be a universal problem. As you can see from the pictures, the ferns, clubrush, and canna all seem to expand into the waterline/grass zone that we targeting for stabilization. These plant locations are susceptible to change depending on water level changes due to dry/wet seasons and above/below average rainfall. Sand cordgrass was also highly recommended for slope stabilization in this zone.

We want to experiment with all the recommended plants in varying combination to see what is more desirable and most effective. This would also allow for a community education program.

- 4. Another attachment includes pictures of the recent erosion repairs, as well as, the abutting land experiencing erosion. You can see how the preservation of the pine trees required backfill and re-construction of the original slope. As you can see in the photos with the cypress trees, this type of re-construction should not be necessary since the cypress trees sit in the water. So, we believe that pond slope stabilization with non-cypress trees will require slope reconstruction and pond slope with cypress trees can be planted with the aquatic plants. In walking along pond slopes with cypress trees, it was quite clear that the cypress knees can be hazardous, and I think we should discuss this condition further at the Board meeting.
- 5. The last attachment contains several locations have narrow strips of CDD owned land between the private property rear lot line and the water line. These areas need to be further field survey for final determination of how much space owned by the CDD. I have currently estimated that there is about 1500 linear feet of slope that will need to addressed to avoid encroachment into private property. I will get with Doug with some measurements so that we can discuss this further at the Board meeting.

Project

Westchase CDD 10107 Bennington Drive Tampa, Florida 33626

Scope

Dragonfly will provide enhancement and repair services as described below.

Bennington Drive Pond

Approximately 360 Linear feet of shoreline on the Lake off of Bennington Drive that requires corrective actions. With most escarpment far exceeding the 9" maximum set by SFWMD. Geo-tubes will be staked and anchored into the shoreline edge and then filled with bottom sediment. Once the material has suitably drained, sod will be placed over the top of the tubes. Then a row of Pickerel Weed will be planted at the toe of slope on 3' centers. This project adds back shoreline previously lost and helps protect against future erosion.

Visitor Management

The dwellingLIVE Visitor Management System is the premier solution for communities of any type and size who are concerned about controlling who comes and goes in their community. It provides Community Managers and HOAs with a flexible, web-based interface through which they can configure and monitor the system. Gate Attendants can expedite visitor and resident access through purpose-built computers, while still maintaining a highly secure and professional image. Residents can manage their guest lists online, or on their phone app, knowing that their information is secure and always visible to the Attendants.

dwellingLIVE offers the most complete and feature-rich community Visitor Management solution on the market.

Providing increased efficiency and accuracy through these features and benefits:

- · Reduce long lines of visitors waiting at gates
- Guest are admitted without repeated calls to residents
- Handwritten passes are a thing of the past
- · Gatehouse PCs are kiosked to eliminate unauthorized access
- · One-click pass printing
- Optional License Plate Recognition streamlines guest entry

- · Barcode scanning for returning visitors
- · Resident profile data is visible to attendants
- Daily Activity Reports and Customized Incident Reports
- Drivers License Recognition
- ...and much more

Internet-Independent Visitor Access:

dwellingLIVE's gate computers are configured to operate even if Internet access is lost at the gatehouse. Attendants continue to access the database as it was at the moment of service loss and all transactions to and from the gate computer are immediately synchronized when Internet service is restored.

Guest Pass Printing:

Managers can configure passes to the unique needs of their communities without the requirement for special programming. Printer options include direct thermal, thermal transfer and Dymo™ for building lobbies. Print a pass with just one keystroke! Return visitors can be tracked via an optional Bar Code on the pass. Property directions appear on the pass. New design templates coming soon.

Notifications:

Residents can choose to receive emails or text messages when guests are added to their account or when passes are issued for their address. Abuse can be detected immediately and action taken from anywhere there is an Internet connection.

ePass

A simple two-step process allows residents to create a unique and temporary electronic visitor pass for their guests. An email will be sent to the guest containing a QR code visitor pass. Upon entry to an attended or unattended gate, the guest simply scans the QR code from their smartphone to access the community.

Auto-Dialing Feature:

Attendants can dial a resident's home or mobile phone with a single keystroke through the gate computer - another feature that contributes to making dwellingLIVE's Visitor Management System the most efficient on the market.

Automated Guest Registration Call Center:

Allows gate attendant to process visitors at gate instead of resident phone calls. Residents call toll-free automated number to add guest.

License Plate Recognition:

When integrated with dwellingLIVE LPR, the system provides even more efficiencies. Returning guests are recognized by their license plates, making guest registration simple and fast for guest and attendants.

Unified, Secure Database:

Managers, property owners and tenants all work through web-based interfaces. Data is stored on dwellingLIVE's secure servers in a SAS-70 compliant facility and is constantly backed up and always available. Data replication keeps gatehouse systems current at all times.

Telephone Entry Systems:

No more software, modems or hassles of managing telephone entry systems. dwellingLIVE software remotely programs and operates our most popular telephone entry system models.

Drivers License Recognition:

Automatically stores drivers license information by scanning the 2D bar code located on the license. New advanced scanner is required to function properly. Available on app and web stations.

Web or App Station:

Allows communities to use any web browser to process visitors. Limitations apply. Computer not supplied.

Resident Guest List Phone App:

Allows residents to manage their guest list and profile information. Available for download on iPhone or Android. 99¢ charge.

COMING SOON!

Mobile Tablet App Station:

Portable, lightweight app station.

Credentialed Access

The dwellingLIVE credentialed access control system is the perfect solution for communities of any size. It provides community managers with realtime access control of all their gates and doors. Through an intuitive interface — accessible from any web browser — managers can administer the system. It has never been easier to issue transponders, wallet cards and key fobs — and to monitor their activity in realtime.

Even residents can retrieve their personal access activity.

dwellingLIVE web-based software connects to onsite HID VertX Network Controllers via the internet. VertX models can support from 2 to 64 doors each. There is no limit to the number of controllers, interfaces and readers you can install in your community.

Works with any type of reader system*

- Proximity Key Fobs
- RFID Transponders
- · Radio Transmitters
- Wallet Cards
- Pin Pads...and many more

Seamless Integration:

The dwellingLIVE solution can work with previously installed, industrystandard reader technology to significantly reduce installation costs. Interfaces support Wiegand connections.

Application Integration:

The Credentialed Access System is fully integrated with other dwellingLIVE products, such as Visitor Management, License Plate Recognition and Community Websites.

Elevator Control:

Floor enable elevator controls that allow unlimited cabs, unlimited floor controls and unlimited elevator groups for access levels.

Crisis Management:

Managers have web access to all doors and gates and can remotely operate them individually or facility-wide.

Live Monitor:

Managers and gate attendants can view all credentialed access transactions throughout the community as they occur.

Hold Open Schedules:

Managers have the capability of creating schedules, assigning to access points, ensuring access during the given time period.

Activity Monitoring:

Realtime activity alerts can be sent via email or text message. The **Virtual Chaperone™** feature allows residents to manage and track their card usage at anytime.

Web-Based Administration:

Managers, property owners and other authorized users all work through web-based interfaces. Data is stored on dwellingLIVE's secure servers in a SAS-70 compliant facility and is backed up and always available.

Multi-Level Control:

Managers control the system access levels of owners and tenants by configuring door groups, access levels and open/close schedules. Operational efficiencies are achieved with round-the-clock administrative access.

dwellingLIVE ASU:

As with all dwellingLIVE applications, users can be assured that they are always connected to the latest and greatest versions of software through our **Automated Software Update** feature.

Total Cost of Ownership:

The TCO of dwellingLIVE's Access Control System can be up to 60% less than traditional PC-based systems. Lower up-front system and installation costs enable Property Managers and HOAs to focus their working capital where it is most effective.

Hardware Monitoring:

Complete inventory of credentialed access hardware with online/offline status, including email notifications.

Door Monitor:

Manage Door Hold Open and Door Forced alerts, notifications, timing and trigger auxiliary alarm relays.

Community Website

The dwellingLIVE Community Website is not just another community website! It seamlessly integrates with other dwellingLIVE products, providing community managers with the tools to build a dynamic portal that residents will visit again and again. While some of the features may be found on other community websites, dwellingLIVE puts a unique twist on many of them.

Announcements: Community updates and announcements appear on resident's home page. Management can poll residents for feedback.

Newsletter: Newsletters are permanently archived and always available online.

Event Calendar: Management can create events for all to see. Residents can RSVP to events, giving management headcount for planning purposes.

Address Book: Residents decide what information to share in the community address book.

Documents & Forms: The dwellingLIVE system acts as a central repository for documents and forms. Documents can be made public or access can be restricted to certain Boards and Committees – configurable and organized according to each community's needs. Fill-in-Forms can be created for residents to complete online – eliminating paper forms and protecting the environment!

Amenities & Reservations: Community amenities such as tennis courts, party rooms or even overnight accommodations can be maintained online. Management can determine if an amenity is reservable and residents can view availability and book online.

Photo Gallery: Management can create and maintain Photo Albums online. Residents can browse albums and download pictures.

Local Information: Management can maintain an up-to-date list of local services and amenities, such as schools, utility companies and public agencies. Residents have the community information they require at their fingertips! Residents can add their own listings as well.

HOA Contacts: Management can publish a contact list that can include sections such as Board Members, Community Management and Public Safety. Residents can rely on being able to find the right information in one place.

Service Requests: Residents can complete Service Requests online. By creating certain categories, management can channel the requests directly to the parties responsible to address them. Homeowners can rest assured that their requests are going to the right individual in a timely fashion.

Billing Statement: HOA Account information can be loaded into dwellingLIVE, allowing homeowners to view their account statement and even pay the balance using PayPal or other financial services.

Bulletin Boards: Residents can post to the Community Bulletin Board, including pictures and contact information. Management can act as the Bulletin Board moderator, reviewing and approving all posts before they become visible to other residents.

Custom Pages: Management can expand the standard capability of the Community Website by adding customized pages which includes text and unlimited attachments. In this way, Residents can be kept abreast of special projects that do not fall into any of the standard categories.

Navigation: Customize the residents' menu order, and create custom links to external websites.

Notifications: Residents can opt in to receive text or email notifications for website updates.

Groups and Clubs: Administrators can create groups or clubs for community residents.

Forums: Administrators create forum topics for residents to engage in discussions with one another.

Sub-Association Content Filtering: Allows administrators to create categories to filter website content.
