2	Development District Board Meeting, on the 5th day	2	fine if you guys are okay with me just going
3	of January, 2021, at the Westchase Swim & Tennis	3	ahead into these items.
4	Center, 10405 Countryway Boulevard, Tampa, Florida,	4	So on the cell tower, the northern site,
5	beginning at 4:06 p.m., reported by Kimberly Ann	5	which we are calling Parcel B, the board
6	Roberts, Notary Public in and for the State of	6	approved that at last month's meeting, and
7	Florida at Large.	7	I've been going back and forth with Vertex
8	* * * * * *	8	about some final changes to the lease
9	CHAIRMAN LEWIS: All right. I'll call	9	agreement and also the format of the estoppel
10	this December excuse me I'm looking at	10	certificate.
11	the looking at the approval of the minutes	11	And it's been finalized, and now it's
12	January 5th, 2021 meeting to order. And	12	been executed by Vertex, and I brought two
13	we'll start with the Pledge of Allegiance.	13	originals with me today, so Matt can sign
14	(The Pledge of Allegiance was recited.)	14	them, and I think then it will be the ball
15	CHAIRMAN LEWIS: All right. Let the	15	will be in Vertex's court to get going on what
16	record show that all supervisors are present,	16	they need to do regarding the site.
17	and I hope everybody had a great holiday	17	I saw that Stephen had passed out some
18	season. It looks like everyone did.	18	information from the review of the site that
19	Welcome back. 2020's in the past.	19	
20	•	20	they had done, so I was going to communicate
20	Right? Just need consent agenda approval for	20	with Alan Ruiz from Vertex, and, you know,
21	the December 1st meeting and financial	21	just offer that we can provide them with the
	statements.		information that's been done at this point by
23	MR. BAUMHOVER: (Raises hand.)	23	JMT, if you're okay with that also
24 25	MR. CHESNEY: Second. CHAIRMAN LEWIS: All in favor.	24 25	MR. BRLETIC: Yeah. I would just say
20	CHAIRMAN LEWIS. AII II Idvol.	25	when you do talk to them, the caveat with this
	Page 6		Page 8
1	(All board members signify in the	1	is this is just based off this isn't based
2	affirmative.)	2	off of, you know, a formal delineation like a
3	CHAIRMAN LEWIS: Motion passes five to	3	biologist about, you know, exactly where the
4	zero.	4	lines have been flagged, but this is a pretty
5	(Motion passes.)	5	good indication of the area based off of one
б	CHAIRMAN LEWIS: Moving on to the	6	soils I know Robert did a site visit,
7	engineer's report. Erin.	7	walked the entire property, and any old
8	MS. MCCORMICK: Yes.	8	records that we were able to find, which had
9	CHAIRMAN LEWIS: I'm sorry.	9	some of the just kind of general
10	MS. MCCORMICK: No. You know, these	10	information about wetlands in the area.
11	three items that are under the engineer's	11	So if they wanted to I mean, they're
12	report, I had emailed Sandra to put them on	12	going to have to do it through the permit
13	the agenda, and I think she accidentally put	13	process is probably get it formally
14	them under engineer versus the attorney, so,	14	delineated. And I know that we talked about
15	Stephen, I don't want you to be concerned	15	the corner I guess it's the southeast
16	because I really didn't intend to address it	16	corner of the western part parcel there
17	in my report. I'm sorry if I worried you.	17	where the you know, where we say that
18	MR. BRLETIC: No. No. I'm sorry. When	18	there's 1.8 acres, in that general area.
19	I saw the agenda, there's a couple of these I	19	That would be ideal, you know, I mean, I
20	really didn't know what we had to talk about	20	guess if the plan would be you know, I
21	with	21	don't know if Robert had told me you guys
	MC M CODMICK DI LI VI L		

22 22 MS. McCORMICK: Right. Yeah. 23 23 MR. BRLETIC: -- but I don't know if 24 you'd like to go first, and I can just chime 24 in, because basically we're going to overlap. 25 25

had talked about what do we really have out there. If you wanted to kind of, you know, lead yourself -- it's really -- it's really, I guess, it's up to them which part they want to

		1	Agenda Page 7
	Page 9		Page 11
1	try to get their I know, it's a small	1	representations to them because they need to
2	space, hundred by hundred, or something like	2	be responsible for doing their own due
3	that, but either side could work.	3	diligence on this site, and the CDD does have
4	But this is just like I said, just	4	the final approval of the actual location
5	with the caveat that they'll still have to go	5	where the cell tower is going to go on the
б	get it formally delineated. And really the	6	property, as well as the access that's going
7	biggest problem with just the west you	7	to be used to get to the site where the cell
8	know, where that line is, is not clear.	8	tower will go.
9	It's actually because when they built	9	MR. BAUMHOVER: I have a question.
10	that road, there's a drainage issue.	10	CHAIRMAN LEWIS: Go ahead.
11	Basically where the water is trapped there.	11	MR. BAUMHOVER: Other than the
12	So it's not that it ever was a wetland almost,	12	delineation of wetlands versus not wetlands,
13	but because of the drainage problem where they	13	are there any other restrictions from the
14	blocked the water off and there's a lot of	14	CDD's perspective that you would advise us,
15	standing water, it's becoming a wetland.	15	or
16	So it's almost like there's a little bit	16	MR. BRLETIC: Yeah, the biggest one for
17	of a weird spot where they're starting to get	17	this one is going to be access. So we've only
18	some of the indications, like plant growth and	18	Hillsborough County utilities are on this
19	things like that, but it's almost just because	19	map. The only reason is, is because to put it
20	of the drainage issue. It's not because it's	20	in this other area is very so this is a
21	a natural wetland.	21	heck of a lot of overlapping weird stuff.
22	The two spaces that we left blank that	22	When you go to do the research on that piece
23	aren't shaded, those are, for sure, always	23	of property
24	been part of the wetland system, so	24	MR. BAUMHOVER: Right.
25	CHAIRMAN LEWIS: So only the red areas?	25	MR. BRLETIC: there's TECO, there's
	Page 10		Page 12
	2		
1	MR. BRLETIC: Yeah. The red areas are	1	all kinds of weird stuff, so we would really
2	what we're calling as potential uplands.	2	have to hack out like, say, we were going
3	CHAIRMAN LEWIS: Okay. All right.	3	to reserve this for us to do something like a,
4	MR. BRLETIC: And if they want to reach	4	perhaps, park, a dog park, something along
5	out to us, they can do that, and we can	5	those lines, if that's what you're thinking,
6	discuss, you know so what I would say if		we'd still have to get over the hurdle of
7 8	they're going to go through the permitting	7	access, just kind of trying to wade through
° 9	process, they're going to get that done	9	all that easement and see what is actually
10	anyway, and better to do it on their dime than ours.	10	possible, but MR. BAUMHOVER: So you're telling Vertex
11	You know, it probably would be a cost to	11	that that's their responsibility, to resolve
12	the district to do a formal wetland	12	all easement issues, that then there's
13	delineation. It's not super expensive, but	13	really nothing else that like from a CDD's
14	it's something that if they can do it, then	14	perspective that we would need to know about
15	let's	15	before we tell them
16	MS. McCORMICK: Yeah. No. I think	16	MR. BRLETIC: Right. No. I think that
17	under the agreement they have the obligation	17	if so if they can if they get an access,
18	to incur all of the costs and do all of the	18	you know, then it's definitely it will be
19	work regarding the permitting and approvals	19	much easier for to us to piggy-back off of
20	that are going to be necessary for the cell	20	that, to extend that to the east maybe, and
21	tower.	21	then it just becomes a development plan and
22	My thought was just, you know, in the	22	stuff, that maybe you'll get a permit showing
23	spirit of cooperation, to just offer to share	23	the limits of what you wanted to do and what
24	the information that you all had done	24	the purpose would be and so on and so forth,
25	preliminarily, but not to provide any kind of	25	whether you wanted parking, and things like
		1	

Page 13       Page 15         1       that, come into play.       perspective, I mean, the lease and the option         3       Once you get through that, I think you're in       agreement that we have with Vertex, the option         4       the clear to kind of start thinking about, you       the know, what we can put there.       might include the wetland delineation within         6       CHAIRMAN LEWIS: Wr. Ross.       6       might include the wetland delineation within         6       Properly noted that Mr. Chesney has raised the       5       construction, within 18 months and to be         7       MR. ROSS: I have two querestors. You       7       required, if they move forward to commence         8       properly noted that Mr. Chesney has raised the       8       construction, within 12 months       2         10       that we'se unintentionally - or somebody's       1       8       advice is going to be we're better off to do         11       the property out there, and you just mentioned       1       1       made and ad dires now before the problem or       1         12       that we'se unintentionally - or somebody's       1       1       1       1         13       unintentionally endore the problem or       1       1       1       1         14       Ts thas to some rol later, let's just go albed an
2       But, yeah, you're absolutely right.       2       agreement that we have with Vertex, the option period is for a 12-month time period, so they have to probably do the due diligence, which might include the wethand delineation within 22 months and to be completed with construction, within 18 months and to be completed with construction, within 18 months and to be completed with construction within 22 months.         6       CHAIRMAN LEWIS: Mr. Ross.       6         7       MR. ROSS. It have two questions. You       7         8       properly noted that Mr. Chesney has raised the issue that we should be considering or at issue that we should be considering or at issue that we wortherionallyor somebody's       10         10       least have on our radar possible uses for its writh retwork.       MR. ROSS: If you're advising if his advice is going to be we're better off to do it our simy advocacy to the board, that we know we're going to do it advice is going to be we're better off to do it as somer or later, let's just go ahead and do it now is my advocacy to the board, that we know we're going to do it it sooner or later, let's just go ahead and do it now.         10       long period of time. It seems like this has is period of time. It seems like this has is period of time. It seems like this has is period of time. It seems like this has is period of it is is something that is may be going to be delayed and want to get the ball rolling instead of waiting, then what I       MR. BAUHHOVER: You're talking about both parcels, not just the one that we think there you realy opends to eldayed and want to get the ball rolling instead of waiting, then what I         1       then I would say things a
3     Once you get through that, I think you're in the clear to kind of start thinking about, you know, what we can put there.     3     period is for a 12-month time period, so they have to probably do the due diligence, which might include the wetland delineation within       6     CHAIRMAN LEWIS: Mr. Ross.     6       7     MR. ROSS: I thave two questions. You properly noted that Mr. Chesney has raised the sisue that we should be considering or at     9       9     properly noted that Mr. Chesney has raised the sisue that we should be considering or at     9       10     least have on our radar possible uses for     10       11     the property out there, and you just mentioned     11       12     that we vera mork instruction within 22 months, so that's the window for their work.       13     unintentionally begun to create a wetland.     13       14     Is that something that we should go     14       15     ahead and address now before the problem or     16       16     staution worsens?     17       17     MR. RAUETIC: Well, when you're talking about it becoming a wetland, it happens over a     18       10     long period of time. It seems like this has     19     MR. RAUMHOVER: You're talking about       21     Trond.     21     Werts might want to build on.       22     Thm not sure when that happened. Maybe     23     consistent with tare would be towould be. So if it's within a year,
4       the clear to kind of start thinking about, you       4       have to probably do the due diligence, which         5       know, what we can put there.       5         6       CHAIRMAN LEWIS: Mr. Ross.       6         7       MR. ROSS: I have two questions. You       7         8       properly noted that Mr. Chesney has raised the       8         9       issue that we should be considering or at       9         10       least have on our radar possible uses for       10       so that's the window for their work.         11       the property out there, and you just mentioned       11       MR. ROSS: I fyou're advising if his         12       that we've unintentionally begun to create a wetland.       13       it ourselves so that we can control all the         14       Is that something that we should go       14       it ourselves so that we can control all the         15       ahead and address now before the problem or       15       ahead and do it now is my advocacy to the         16       board, that we know we're going to do it       sooner or later, let's just go ahead and do it         17       MR. BALETIC: Well, when you're takling       17         18       about it becoming a wetland, it happens over a       18         19       long period of time. It seems like this has       19
5       know, what we can put there.       5       might include the wetland delineation within         6       CHAIRMAN LEWIS: Mr. Ross.       6         7       MR. ROSS: I have two questions. You       7         8       properly noted that Mr. Chesney has raised the       9         9       issue that we should be considering or at       9         10       least have on our radar possible uses for       10         11       the property out there, and you just mentioned       11         12       that we've unintentionally or somebody's       11         13       unintentionally begun to create a wetland.       13         14       Is that something that we should go       14         15       ahead and dotess now before the problem or       15         16       bizadin worsens?       16         17       MR. BRLETIC: Well, when you're talking       17         18       about it becoming a wetland, it happens over a       18         19       long period of time. It seems like this has       19         20       been going on forever since they built that       20         21       road.       21       MR. BAUMHOVER: You're talking about         22       Tm not sure when that happened.       Maybe       23
6       CHAIRMAN LEWIS: Mr. Ross.       6         7       MR. ROSS: I have two questions. You       7         8       properly noted that Mr. Chesney has raised the       8         9       issue that we should be considering or at       9         10       least have on our radar possible uses for       10         11       the property out there, and you just mentioned       11         12       that we've unintentionally begun to create a wetland.       13         13       unintentionally begun to create a wetland.       13         14       Is that something that we should go       14         15       ahead and address now before the problem or       15         16       situation worsens?       16         17       MR. It seems like this has       19         20       been going on forever since they built that       20         21       road.       21         22       Tm not sure when that happened. Maybe       23         23       it's been maybe five years. It really depends       23         24       on what the timeline for the - for the cell </td
7       MR. ROSS: I have two questions. You       7       required, if they move forward to commence construction, within 18 months and to be construction, within 28 months, so that's the window for their work.         11       the property out there, and you just mentioned       10       so that's the window for their work.         12       that we've unintentionally - or somebody's       12       advice is going to be we're better off to do it ourselves so that we can control all the potential interested parties, then let's go ahead and doit now is my advocacy to the board, that we know we're going to do it sooner or later, let's just go ahead and doit now is my advocacy to the board, that we know we're going to do it sooner or later, let's just go ahead and doit now is my advocacy to the board, that we know we're going to do it now.         13       ahead and darderss now before the problem or situation worsens?       16       board, that we know we're going to do it now.         14       Tr mot sure when that happened. Maybe       17       most sure when that happened. Maybe       18         14       Tr not sure when that happened. Maybe       12       Tr mot sure when that appened. Maybe       12         14       then I would be. So if it's within a year,       25       MR. ROSS: I think that would

1	That's the most efficient and	1	instead of having this back and forth.
2	CHAIRMAN LEWIS: There wouldn't be an	2	The reason why developers like to do
3	issue if we chose to do that as a board versus	3	that is because they like to try to get as
4	anything that Vertex may end up doing that	4	much as possible and see what they can get
5	wouldn't hinder do you see any potential	5	away with.
6	there with their process?	6	MR. WIMSATT: Exactly.
7	MR. BRLETIC: Well, I mean yeah. So	7	MR. BRLETIC: We don't really have that,
8	the only thing that I think could happen	8	you know, intention really. It's more of
9	probably would be, so we'd go ahead and get	9	just, "Hey, let's agree on something." This
10	our lines delineated this is just an	10	is probably the right time to do it, too,
11	opinion thing and somebody can go out there	11	where it's not wet. You're going to be able
12	and say the flag is two feet over or whatever,	12	to access the whole area, probably get a
13	so they would just have to it's like which	13	better line than you would in the middle of
14	one comes first, which one gets approved	14	the summer kind of thing.
15	first, that would be the one that everybody	15	But, yeah, I mean, that would definitely
16	has to use.	16	head off the conflict between us and SWFWMD
17	So if they start their permitting	17	are just to meet them and hash it out in the
18	process and we've already done our lines, then	18	field.
19	we'll have to we'll have to offer that up	19	MR. ROSS: My feeling is you know the
20	and say these are the wetland lines, or pull	20	best way to do. I believe you understand our
21	the records from SWFWMD, those lines have	21	object, which is to not be casual and
22	already been, you know, on file out there, you	22	unintentionally lose the opportunity for a
23	know, kind of thing. That's the only problem	23	possible use of our property.
24	I see.	24	I'm not trying to pull one over on
25	MR. WIMSATT: I would say if SWFWMD is	25	anybody or get away with something. It's just
	Page 18		Page 20
1	involved when we're involved, does that create	1	rather the opposite. Let's not be so relaxed
2	a presumption that SWFWMD has already said	2	that we sit back and let somebody else set the
3	this, the lines are then presumed to be the	3	agenda, if you will, and then we're
4	good our lines are the ones that count?	4	unintentionally in an argument.
5	You know what I mean?	5	If you're in an argument, you're at risk
6	MR. BRLETIC: You mean like	6	someone is going to decide against you, not in
7	MR. WIMSATT: For instance, in terms of	7	your favor, and that's what I want to avoid is
8	there's a conflict between what they're saying	8	to make sure we can maximize our opportunity.
9	and what we're saying. SWFWMD and SWFWMD	9	So if you're saying you know the best
10	and you all agree, hey, here's the wetland	10	way to do it is to meet them and do it
11	boundaries, but it's not the wetland	11	MR. BRLETIC: Yeah.
12	boundaries most likely. Right?	12	MR. ROSS: that's fine by me. I
13	MR. BRLETIC: Right. Yeah. And that's	13	don't know if I need to make a motion, but
14	why we wanted to do it both at the same time.	14	CHAIRMAN LEWIS: I was about to ask the
15	Sometimes it's just to speed things up. It's	15	same question.
16	just more like when you're doing like	16	MR. ROSS: I feel you understand our
17	commercial development, sometimes they just	17	agenda and our
18	send their guy out there, they flag it, and	18	MR. BRLETIC: Yeah. Absolutely. We can
19	they submit it just so they can get the ball	19	probably we can probably get a meeting and
20	rolling. Sometimes that's just the way things	20	at least get the field flagging done by the
21	are.	21	end of the month, and then get our surveyors
22	What I would advise here is just to have	22	out there to pick it up and do a simple
		23	survey.
23	us leave them on site, so they're both		-
23 24	reviewing it, there's no discrepancies, they	24	We would probably have it within six
		24 25	We would probably have it within six weeks. I mean, that's like, you know,

		1	Agenda Page 10

1	conservative. It could probably be a lot	1	be is that what will be required of the permit
2	faster than that. The filing is going to take	2	is we don't necessarily have to do the field
3	a little bit of time, you know, to get it in	3	work for, like I say, for annual survey or
4	writing.	4	anything like that.
5	So we're saying maybe two months to get	5	That will be a requirement of the
б	it where they say, "Okay, it's filed with	6	permit. They'll have to at the end of the
7	SWFWMD. This is what's been accepted on	7	job, they'll have to submit something that
8	file." And then we would pass that over to	8	says it was built on coordinates with it.
9	Vertex for their use, and then we would have	9	I mean, we can check things like as
10	it, like you said, for the whole property.	10	much or as little as you guys want. You know,
11	It probably wouldn't be a bad idea for	11	we could it would just be a coordination
12	planning, too, because then you'd really know	12	effort with Vertex.
13	how much room you've got.	13	MR. ROSS: Well, I don't want to
14	MR. ROSS: And that kind of ties into a	14	overcomplicate it or unnecessarily incur
15	comment about of just generally dealing with	15	expense, but my experience is it's nice to
16	the wetland issue. We're going to incur the	16	know you've got somebody going out to the
17	expense sooner or later. So why not go ahead	17	project, looking at it. One, it keeps the
18	and incur it now? And, again, ahead of the	18	contractor on their toes, but it also give us
19	curve instead of on it.	19	the assurances it's being done correctly.
20	But my second question was, since	20	In our role as a district, we may get
21	there's going to be construction going on and	21	questions from the residents or whatever, and
22	you mentioned there may be a small issue with	22	it would be nice to be able to tell them we've
23	regard to the exact placement of the tower	23	got an expert who's out there in the field and
24	this way or that way, are you the one who will	24	looking at it and making sure it's been done
25	be monitoring that and making sure it's in	25	correctly. So I personally would advocate

Unless we're going to take out the soccer field or we're going to take out the playground or something like that, I don't think any of us are in favor of that. CHAIRMAN LEWIS: Right. MS. McCORMICK: And the fencing, just to get back to that, because I had asked Alan about that, too, because I looked at this, and, to me, it looks white, and he emailed back or we email back and forth, and he said, "No. In fact, it's going to be light tan." It's just in this picture it looks very light to me, but he did say it was going to be a tan color. CHAIRMAN LEWIS: Well, I think there's a chance, too I mean, they have different	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	comment on that because maybe it really wasn't discussed at a board meeting, but Erin and I discussed that, and we were a little bit afraid that the county may have some reservations about it because it had not been shown that way in any other rendering or discussion. And so with you know, with a lot of the hoops that we're jumping through already I don't know if that's the right way to put it but a lot of the process that we're going through, we jut didn't want to sort of spring a new scenario on them that might start to hinder the process even more, so Mr. Chesney, did you have a question or a comment? MR. CHESNEY: I was just going to my only comment was she said about being forthright, I think she was pretty clear in the email it was because she thought the pictures looked different. So, I mean, that's her perception. It's difficult to MR. ROSS: I didn't pick up on that

1	difficult for	1	I'm not trying to be silly or anything
2	CHAIRMAN LEWIS: And to Mr. Ross'	2	like that. I just I can't believe that the
3	comment, Erin, are you able to I know you	3	county wouldn't be interested in discussing a
4	kind of jut went over a little bit with her,	4	solution.
5	but maybe she couldn't hear very well. But is	5	MS. McCORMICK: I think that that's
6		6	
	there a way for you to round back with her and		something we can explore. I just think that
7	do an email	7	we should go into this with our eyes open. If
8	MS. McCORMICK: Yeah.	8	we're going to look at reconfiguring this now,
9	CHAIRMAN LEWIS: and let her know	9	then we probably need to, you know, look at it
10	about the process with the county, and	10	from that standpoint, and maybe go then
11	because I do think that's a great point to	11	through the process of providing an update if
12	make, that, you know, hey, we voted on it as a	12	we end up moving the or changing the
13	board, but that there are other, you know,	13	configuration of the cell tower site.
14	hurdles to get through to get this thing	14	So it's you know, it's going to add
15	going.	15	on time to the process, and we also need to
16	MS. McCORMICK: Right. And, you know,	16	see, you know, how Vertex responds to that.
17	like I said, we still have kept the comment	17	But at the end of the day, it's the board's
18	period open till January 29th, so after that,	18	decision.
19	I'm going to go back to the county staff,	19	CHAIRMAN LEWIS: Any other feeling or
20	provide them with the comments that we've	20	comment on that?
21	received so far.	21	MR. ROSS: I would just throw out maybe
22	You know, hopefully they will proceed	22	there's other solutions. So, for example, can
23	with putting this on the board agenda, and	23	you put vines on that wall that face or the
24	I'll definitely make sure that I, you know,	24	gates that would be facing Countryway so that
25	continue to keep in touch with Ms. Belovich so	25	it doesn't look like a hard surface, but more

that issue, and I'm planning on sending one

more letter to TECO, but I've also been, you

know, looking at other options if we need to

pursue through litigation our easement rights

And I'm at the point right now where I

need to get some survey work and some title

with respect to that.

1	MR. CHESNEY: I don't know. I just	1	issues, so
2	looked at it a little bit today. The first	2	MR. BAUMHOVER: And then the next
3	number is what surprised me, because Fund	3	question, just for my kind of awareness, when
4	001	4	we talk roadways on this, I'm thinking how
5	MR. BAUMHOVER: Yeah. In that case, is	5	roadways are budgeted by the county right?
6	it okay for us to maybe push this decision to	6	so roadways and sidewalks. Is this money
7	the next meeting?	7	also including sidewalks?
8	MR. MENDENHALL: Well, I wouldn't	8	MR. CHESNEY: Yes, but only in like, you
9	recommend that, because I'll speak to both	9	know, things behind gates.
10	point, that question, as well the reserves as	10	MR. BAUMHOVER: Right. Right. Right.
11	they are now.	11	But right. So that was my question. I
12	So regardless of what your true needs may	12	wanted to make sure I understood that, so the
13	or may not be for these individual reserves as	13	money that was in the 502, but
14	well as 502, these are dollars that you already	14	MR. CHESNEY: I think that 502 is
15	budgeted in fiscal year 2022, so those dollars	15	literally just left over from we just I
16	are there more or less.	16	remember the transactions and the discussions
17	So by delaying this, it has it makes	17	back
18	no impact because the budget year for 2020 has	18	MR. BAUMHOVER: That was meant to be
19	ended, those dollars are there. At least,	19	zeroed out, not just
20	right now, they are assigned to the various	20	MR. CHESNEY: Well, my memory is not
21	villages, as well as the general.	21	clear enough. I remember bringing it up a
22	So what would wind up happening and	22	number of years ago, but I think this is good
23	typically districts, they look at the	23	because I don't think we have done our road
24	planning, especially for roadways, they look	24	reserve analysis in a long time.
25	at it every few years. You'll have your	25	MR. MENDENHALL: In a while. Yeah, it's
	Page 82		Page 84
1	engineer take a look at whatever model they	1	been a while. Do you want us to start having
2	had, and you'll kind of do a refresher.	2	that discussion with your engineering firm,
3	They'll see where petroleum prices are,	3	kind of get them to at least start looking at
4	if there's any new technology with asphalt	4	the previous modeling and you know, I mean,
5	that makes things cheaper, if there's any	5	in my opinion
6	you know, there's all kinds of things they can	6	MR. CHESNEY: Yes.
7	do, anything from milling to, you know, what	7	MR. BAUMHOVER: Yes.
8	type of product they're using.	8	MR. WIMSATT: Yes.
9	So that's a good idea, and it's probably	9	MR. MENDENHALL: you'll have three
10	something that would be timely. If we do	10	months until you really start your budget, so
11	find, for example and we'll just use the 502	11	it is kind of the
12	because that seems like that might be the most	12	MR. CHESNEY: I think it will actually
13	obvious too much money there for two roads. If	13	benefit us financially. I think given when it
14	that's the case, you, as the board, always	14	was done last and petroleum prices
15	have an opportunity after the fact.	15	petroleum prices really make a huge difference
16	You can reallocate those reserves just	16	in savings, because at one point we had much
17	by a motion. This is not so much this is,	17	higher reserves.
18	yes, it allocates reserves, but it's a	18	After Linebaugh was done, it was
19	procedural step to say the budget year is	19	\$2,000,000, I remember for to us do Linebaugh,
20	done, let's put it in the piggy bank.	20	and we were all staggered because \$2,000,000,
21	Now, it's in the piggy bank, and you	21	we didn't have enough in, so we went in and
22	say, well, we don't really need 502,000. At	22	redid our road analysis and increased it.
23		23	And that might be the one that's still
23	the next meeting, you can find that out. You	1 2 3	And that might be the one that's sain
23	can say, let's move 100,000 into the erosion	24	on file. I don't remember if we backed it

3	MR. CHESNEY: It wasn't in the packet.	3	countereffects of using any chemical products
4	MR. MAYS: She said she put it in	4	that would maybe negate the nano bubbler's
5	DropBox, the letter.	5	effectiveness or possibly damage the equipment
6	MR. CHESNEY: DropBox doesn't work all	6	or know any kind of agreements we have in

8	CHAIRMAN LEWIS: I had the same	8	Like if we're being asked to add
9	conversation with Sonny today.	9	chemicals to the water, is that going to
10	MR. MAYS: Anyway, basically the letter	10	damage the equipment that we actually have
11	was not from an attorney. It was from the	11	there?
12	president of the community, the community	12	I don't think so, but I want to make
13	representative over there, requesting he	13	sure that that is a definitive no. But then,
14	made the way he put it was that it he	14	too, I mean in the interest of extending an
15	didn't want to be pushing us with the	15	olive branch, I would offer maybe to walk with
16	attorneys ordering us to do anything or asking	16	that president, and say, "Hey, you know, we've
17	us to do it.	17	had positive response from your residents. I'd
18	He was asking it basically like, "Hey,	18	be more than willing to walk around with you
19	can you all resume the larvicide treatments?"	19	and let you point out the problem areas that
20	But what they don't understand is, with that	20	are still existing, and we'll be more happy to
21	nano bubbler, with the bacteria he has	21	kind of keep going through this process as
22	injected into the pond, I walked it yesterday	22	long as you see fit."
23	with one of the residents that lives over	23	I have no problem with that. I mean,
24	there, she said she hasn't seen a problem	24	I've walked that area. I haven't done it in
25	since we started using that nano bubbler on	25	the past two months, but, I mean, I walked
	Page 90		Page 92
1	that pond.	1	there when it was really bad, and I walked it
2	So my concern is, how should we respond	2	later on when it wasn't so bad at all. So
3	to the man that sent us the letter? Should we	3	observation, I just want to make sure we don't
4	have, you know, Matt over here just to	4	damage
5	basically send a letter stating what we're	5	CHAIRMAN LEWIS: Sure. Yes, sir.
6	doing now in place of a larvicide? We're	6	MR. ROSS: My viewpoint is that if
7	using a bacteria that works on killing larva,	7	they've retained an attorney in the past, we
8	also and working on cleaning up that pond,	8	have to be mindful of that, that our
9	continuing we haven't stopped cleaning it	9	communications someday may be the subject of
10	up, in other words, so	10	a deposition, and that can be a very expensive
11	CHAIRMAN LEWIS: I had caught up with	11	and distasteful process.
12	Doug and Sonny today just actually about my	12	So my feeling is, if you were to reach
13	iPad and ended up meeting earlier.	13	out to them, any letter should be first
14	But my thought and I'll let you speak	14	reviewed by our legal counsel and make sure
15	in a minute was kind of they're extending	15	she feels comfortable, that if you felt it was
16	an olive branch without an attorney, more at a	16	more prudent to have a one-on-one
17	board level, and I thought it might be a good	17	conversation and I recognize the benefits of
18	idea if we responded in kind, but I definitely	18	that, less formal, more you can eyeball
19	wanted to hear your thoughts because I know	19	somebody and such, just understand you're
20	where this went last year, for sure, so	20	exposing yourself to that risk and it's a risk
21	MR. BAUMHOVER: This is the same group	21	you feel comfortable with, then I have no
22 23	of people that actually had an attorney send	22 23	objection to you meeting with any neighbor of
23 24	us a letter. Right? CHAIRMAN LEWIS: That's correct.	23	ours. CHAIRMAN LEWIS: Okay. Very good.
24	MR. BAUMHOVER: So I would ask two	24	MR. MAYS: To answer your questions,

5	MR. BAUMHOVER: It wouldn't affect the	5	know, we have the two fountains with the

7	MR. MAYS: No. We're talking millions	7	lights.
8	of gallons of stuff that, you know, it's	8	The company that installed it, you know,
9	washed out by then.	9	the company that manages and kind of has the
10	And to answer question number two, our	10	maintenance agreement on the fountains
11	company that installed the nano bubbler and	11	whenever we need to change lenses, colors,
12	has been treating and injecting this pond with	12	they do all that kind of stuff for us.
13	the bacteria, they said it would be a waste of	13	Since they put this machine in there,
14	time.	14	the lighting setup it's through an app. I
15	They actually sent me some literature	15	called showing concern that who is controlling
16	today on what that bacteria, what it does and	16	the app. Is this something that we should
17	the way it does help against any kind of	17	control? Is it something that we should
18	larva, whether it be a mosquito larva or any	18	continue to let them control?
19	kind of larva, you know.	19	Right now, he is asking me to get with
20	MR. BAUMHOVER: Right. So I guess I	20	whoever we need to to give him a schedule of
21	misstated my question. I meant, is there	21	what months, you want what color. So
22	going to be any impact of the larvicide that	22	basically, I'm, you know
23	basically makes that part of the process less	23	MR. CHESNEY: I thought we could do it
24	effective?	24	now. I didn't mean to interrupt.
25	MR. MAYS: It's a possibility there when	25	CHAIRMAN LEWIS: No. No.

2	you talk about it that way, but according to him he's asked me, too don't use the	2	MR. MAYS: Basically that's what I'm thinking, we should be able to take it over,
3	larvicide because he does he's convinced	3	but I wanted to bring it to you guy's
4	and he's sure in what we're seeing so far is	4	attention first and see if you guys
5	their bacteria is helping with this midge fly	5	CHAIRMAN LEWIS: So they manage it and
6	problem, so it's, like I say, we can it's	6	installed it, but they don't control the app
7	like throwing \$700, \$600 down you know,	7	that controls the light color?
8	down the toilet.	8	MR. MAYS: Yeah, they do. They control
9		9	it.
10	It's not needed, but we have to explain it to them. That's what my concern is. Let's	10	CHAIRMAN LEWIS: They do. Okay.
11	explain it to them, and whether it be one-on-	11	MR. MAYS: And that's why he's asking
12	one or through a letter from Matt with Erin's	12	for us to give him you know, if we want to
13	5	13	change the color, just give him the color.
14	help, you know, approving what we say to them, so we don't say the wrong thing, but	14	If we want to make out a list, okay,
14	MR. BAUMHOVER: I don't want to spend	15	January goes with this, February this color,
		16	you know, March and so on and so on, a
16	more money on something that might be	17	different color. Do we want to do it that
17 18	counterproductive	18	way? How do we want to handle it?
	MR. MAYS: Right.	19	CHAIRMAN LEWIS: I just may have
19	MR. BAUMHOVER: to the money that	20	forgotten. I mean, was that part that
20	we're already spending.	21	wasn't part of the agreement to have control of

17	if we want to control it.	17	whatever mode they're in.
18	CHAIRMAN LEWIS: I agree.	18	MR. MAYS: Right.
19	MR. ROSS: You're exactly right.	19	CHAIRMAN LEWIS: Very good. Doug,

Subject: RE: Proposed Cell Tower Comments - Glencliff Park

Dear Ms. Brown,

Thank you for your comments. I will distribute these to the Board members so that they have them in advance of the next Board meeting, which will be Tuesday, Feb. 2<sup>nd</sup> at 4:00 p.m. at the Westchase Swim and Tennis Center. The Board meets on the first Tuesday of each month at 4:00 p.m. (with a couple of meetings throughout the year that are held on the 2<sup>nd</sup> Tuesday of the month, if the first Tuesday is impacted by a Holiday).

With respect to the flag issue you raise, the Board has determined that it will not have a flag on the top of the tower. I will make sure the Board is aware of the other comments in your letter concerning the fencing, landscaping, paint color for the cell tower pole, trail, the preservation of the surrounding area, and communication regarding preparation and construction at the site.

I hope you have a good weekend.

Erin

Subject: Proposed Cell Tower Comments - Glencliff Park

Ms. McCormick -

I am writing to you in response to a solicitation for comments on the proposed Cell

Tower in Glencliff Park's southern parking lot. My family and I are residents of Woodbay, the neighborhood directly across from the proposed tower site, and our house backs to the lake across from the proposed tower site. Needless to say, we will be able to see this tower from everywhere in our backyard, from our pool, and from every window along the back of our house - including our kitchen, dining table, and master bedroom sliders.

My family, and many of my neighbors, agree that improved cell service in the area is very necessary and desirable. While we are not exactly thrilled about the location of the cell tower, we understand that the location is pretty well-settled and there are not good alternative sites. Having said that, and assuming the Glencliff Park south lot location is the final location, I wanted to provide you several comments on the design:

1.) My family and I very STRONGLY oppose having any flag atop the tower - now or in the future. Not because we are unpatriotic, but because we do not want to see any lighting/spotlight on the top of the tower which will be seen at all hours of the night from our back windows. We prefer the dark, natural easterly view we have now. Furthermore, any flag flown from that height will encounter strong winds over time and will tatter quickly, needing replacement more often than I assume the tower operator will want to replace it. We prefer not to see a sun-faded, tattered flag out of our back windows either. So, in conclusion on this point, we'd like some assurances that there will be no flag on the pole from the beginning of use, and that there is a contractual prohibition preventing the vendor or the CDD from adding a flag in the future.

2.) My family and I would like to see the flagpole painted a more natural color, as we believe stark white will stand out more glaringly against the green/dark brown woods surrounding the pole - and will begin to look "dirty" much more quickly as the dust and dirt from the air settles on the pole. It doesn't make sense to us that the pole and the vinyl fence will be two different colors, so we suggest tan for the pole as well - but regardless, white is not a preferred choice.

3.) Which brings me to our comment on the fence, which we have concerns will be the target of graffiti/tagging if it is a vinyl fence. We also think a white or tan vinyl fence would be an eyesore to all those who exit our subdivision, or enter Westchase from the south, who could see the fence. We would suggest a more natural looking, less likely to be defaced, green chain-link fence (green vinyl-coated chain link) with green fence fabric runnning along the inside of the fence. This would protect the internal equipment, be less tempting to vandals, blend the fence into the background better, and be just as durable as the vinyl fence (and I believe it would be less expensive as well). I'd request the CDD at least explore this option.

4.) If the green chain-link is not feasible/considered, then my next comment is that the the landscaping MUST run 360 degrees around the fence - all sides must have the landscaping, not just the west side of the fence. We frequently use the park's amenities, including the basketball courts and the wooden bridge walking path (that starts behind this enclosure), and we'd much prefer to see landscaping than an eyesore of a light-colored vinyl fence. My suggestion would be to run something like bougainvilla, whose thorns will deter anyone from lingering around the fence, with small

Agenda Page 70 pine trees (in keeping with the surrounding tree patterns) interspersed. The photosimulations of the tower fence do NOT show adequate landscaping, and it is impossible to tell from the photos provided whether the landscaping is running all the way around the fence - which we believe it should.

5.) Lastly, we implore you to build and construct this cell tower structure in the way that it will be least destructive to the trees, natural landscaping, and walking paths around the site. We are already losing parking spaces and mature growth trees to put this structure in place, please make the plans such that we don't lose even one more tree or sidewalk than we absolutely have to. Having such close access to Glencliff Park was one of the major features of our decision to purchase a home in Woodbay & I believe any future buyers would feel the same - so I'd like the CDD to be mindful of that as they make their final decisions on this tower.

On a related note - but not a comment on the tower design - my family and my neighbors all request that as the time grows near to actually build this tower that we are all given SUFFICIENT NOTICE AND FREQUENT COMMUNICATION of the prep and construction work at the site - the construction traffic, the noise, and the area congestion that will necessarily accompany the construction of this tower will directly affect all of us whose neighborhood access is across from that lot.

Thank you for your consideration,

Jeanetta Brown & Shalon Smith 12443 Bristol Commons Circle

Jeanetta
