8	MR. GOLDSTEIN: Well, I defer, just if	8	looking for?
9	you wanted to give us a quick recap of your	9	MR. GOLDSTEIN: Yes. Yeah. Thank you.
10	site visit with Brett the other week and what	10	(Ms. McCormick enters the room.)
11	your conclusions are, what you observed, that	11	CHAIRMAN LEWIS: Okay. And let the
12	sort of thing. That might be helpful.	12	record reflect that Erin McCormick has
13	CHAIRMAN LEWIS: Yeah, that would be	13	attended the meeting at this point. Hi, Erin.
14	great.	14	MS. McCORMICK: Hi. Sorry I'm late.
15	MS. THOMAS: Okay. Yeah. We were	15	CHAIRMAN LEWIS: That's okay. We
16	consulted, called in to kind of go over the	16	actually just dived into the turkey vulture
17	issues that we were seeing. We were seeing a	17	discussion.
18	lot of birds on roofs, of course, and we were	18	MS. McCORMICK: Oh, okay. Okay.
19	seeing these in a lot of conservation areas.	19	CHAIRMAN LEWIS: We have a visitor from
20	One of the big conservation areas that	20	the USDA, as well some other familiar folks.
20	they tend to utilize is a small island, that	21	•
22	obviously it's a roost, something that they've	22	MR. GOLDSTEIN: May I I just want to add one thing.
22	, , , ,	22	5
23	established that they have been there for a	23	CHAIRMAN LEWIS: Yes, Rick.
24	long period of time. Vultures do have a season. We do have	24	MR. GOLDSTEIN: When we were doing the site visit, one of the things that you guys

1	vultures that stay, of course, in Florida all	1	pointed out is that these birds were going
2	year round. But we do get an influx from	2	after things like rubber and stuff like that.
3	everyone else's vultures, of course, fly down	3	And one of the problems that we're
4	south for the winter. Like people, they	4	having for the vultures on the roofs is that
5	follow a path.	5	there's a skylight, they've gone around, and
6	And so, unfortunately, due to the amount	6	they're chomping away at the rubber and the
7	of just urban development, they get really	7	coating around there. It's causing some
8	pushed into these conservation areas, which,	8	leaks, and these needs repair and so forth, in
9	of course, have impacted several communities	9	addition to the lanais being disturbed.
10	which I was able to look at.	10	CHAIRMAN LEWIS: Okay. So, you know, we
11	Now, don't quote me on which community I	11	do have an agreement or a contract with USDA.
12	looked at, at which time, because it was kind	12	And you probably know, we are a CDD board, and
13	of a quicker tour. But, yeah, we were	13	obviously I think you guys are talking with
14	definitely seeing damage, we were definitely	14	the HOA well. That's why Mr. Holt is here.
15	seeing a lot of feces, a lot of feathers on	15	MS. THOMAS: Yes.
16	roofs. We witnessed some lanais that had	16	CHAIRMAN LEWIS: I'm not sure if there
17	holes in them and had tears because vultures	17	is an agreement in place at this point or
18	have pretty sharp claws; and when they bounce	18	anything for activities from your office. But
19	kind of across the roofs, which you kind of	19	I think where we as a board had allowed J.C.
20	see them do because they're not very graceful,	20	to go was to hang some effigies.
21	they end up poking holes in lanais, in the	21	MS. THOMAS: Right.
22	screens.	22	CHAIRMAN LEWIS: And I kind of wanted to
23		23	
23 24	So that was kind of what is the gist of		get your take on that. I mean, is it

1	I know we have been told about like fireworks	1	visualization I actually had when J.C. started
2	or pyrotechnics, possibly lethal kills.	2	talking about using these lethal measures. So
3	Maybe if you can kind of run through	3	maybe I'm under maybe my impression is not
4	that on what you're thinking and	4	the one that you want us to have.
5	MS. THOMAS: Yeah. So when I first	5	Can you walk us through what the
6	spoke with J.C. and he kind of gave me the	6	pyrotechnics and the lethal measures might
7	update from what, you know, kind of the CDC	7	look like if we were to go in that direction,
8	had in mind is, is they weren't very	8	in addition to anything else you would
9	interested in doing a lot of noise or doing	9	recommend with the effigies? What would it
10	anything very extreme.	10	look like from your perspective?
11	So the least extreme version that we	11	MS. THOMAS: Oh, yeah, absolutely. So
12	have is just hanging effigies. They're very	12	the biggest thing is, is lethal, we try to do
13	passive, they do work, but the bad thing is,	13	the least as possible right? because
14	is when you have a really established issue	14	that's the highest risk. So we're very
15	that's been going on for a long period of	15	strategic about what we use where and when.
16	time, it's kind of a band-aid.	16	You know, timing is key.
17	They work better in conjunction. It's	17	Lethal is going to help in this
18	kind of like if you have multiple tools in a	18	situation because you have a lot of birds that
19	toolbox, you can get a lot better job done	19	are just so used to people, they just are.
20	than if you're just stuck with using one; and	20	They have lost a lot of their fear, and they
21	that's kind of the unfortunate part with the	21	get, you know, car horns and air brakes and,
22	effigies. Do we use them a lot of times	22	just noise, constant ambient noise, and,
23	successfully? Yes.	23	honestly, they just get used to it, just like
24	But the problem is, is you have a large	24	a lot of other species do.
25	area to cover, and just hanging effigies from	25	Normally what we recommend is usually a

CHAIRMAN LEWIS: Okay. Yes. MR. BAUMHOVER: I'm Forrest Baumhover, I'm one of the board members. I wanted to at least recall my memory of what J.C. had presented to us in kind of at least my impression was that this was going to be a series of escalation escalating measures. MS. THOMAS: Yes. MR. BAUMHOVER: So the first instance was the effigies. At that point, I was under the impression that they were somewhere between 95 and 99 percent effective. MS. THOMAS: Oh, I'm sorry. Yeah. No. MR. BAUMHOVER: Like the other measures I mean, if you walk through the area, and you can kind of see maybe our hesitation to, you know, go out and start shooting animals with, you know, kind of houses right in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	lot of noise or pyrotechnics, which is the fireworks that you were discussing. They're made for nuisance wildlife. That's exactly what they're made for, so they don't fall under the same laws that fireworks do. So with them, they're mainly noise. There's no I mean, yes, there's fire, but, generally speaking, they're very, very safe. I mean, we pop off thousands and thousands of them from one end of our state to the other, and hardly ever, ever have one had an incident with the amount that we use. The bad thing about noise disturbance is they not only harass the vultures, they also harass people. We use more noise, and non-lethal is I would say 95 percent of what we use. Everything but effigies, of course, effigies are non-lethal. We try to use as much non-lethal as we can. Unfortunately, when we get backed into a corner, which is the situation I feel like they're in, you have a really bad issue. And

15	MR. BAUMHOVER: Okay.	15	the risk that this comes up in the future?
16	MS. THOMAS: Like I said, we do have	16	MS. THOMAS: I would continue

20	schools, actually that are currently all	20	nothing better to do than to mess with things,
21	having vulture issues. So it is something that	21	like because that's what they are.
22	we're familiar with.	22	They're like I'm going to pick at this,
23	My thing is, is I would like to do	23	I'm going to pick at that, I'm going to pick
24	something really aggressive to start out with	24	at this because they just have time.
25	for about two weeks. For two weeks, I want to	25	So when we're dealing with vultures,

2	MS. THOMAS: I may shoot a hundred	2	an HOA board member, I'm looking at this in
3	pyros, or I could shoot two. The vultures are	3	the possibility that we may have a continued
4	going to determine how many I'm going to	4	maintenance budget in our operating budget
5	rattle off, and I'm going to keep hitting them	5	moving, again, just like any other maintenance
6	with it until they do what I want them to.	6	to deal with, you know, keeping the vultures
7	CHAIRMAN LEWIS: So if you do it in the	7	at bay, so to speak, or in control.
8	morning, what is the time frame that you would	8	So, you know, I think a lot of us are
9	be looking at?	9	concerned, just as you are, of course, that if
10	MS. THOMAS: First thing in the morning,	10	we push them off of that island, where do they
11	break of day	11	go?
12	CHAIRMAN LEWIS: Is that like at 6:00,	12	But I don't think there'd be a lot of
13	7:00?	13	support from the residents' standpoint to say,
14	MS. THOMAS: break of daylight.	14	well, we'll just deal with it so that nobody
15	CHAIRMAN LEWIS: So right now about	15	else has to deal with it.
16	7:00?	16	I think our job is to protect our homes
17	MS. THOMAS: Uh-huh. Yeah. Because,	17	and our community, and as long as they're off
18	essentially, if we can break up the roost in	18	of our property, it's kind of not our problem,
19	the evening, that's going to be the most	19	even though if may be somebody else's.
20	important because that's where they sleep at	20	But in terms of the CDD, yes. The WCA
21	night. They're all going to gang up on this	21	is sitting in the wings, waiting to see what
22	roost, and they're going to be there.	22	happens here. And if it ends up being our
23	If we don't let them sleep there,	23	problem, so to speak, from a contractual
24	they're going to have to sleep somewhere else.	24	standpoint, we're already having discussions
25	So there's going to be less vultures first	25	and budgeting for that possibility, until it's

They're going to be coming in every year, they're going to have to get driven off, maybe driven from place to place, but it's going to be a regular occurrence. It's probably going to MS. THOMAS: It could be. I mean, we've had HOAs that we've worked for a few years, and then it's very, very minimal, and then they keep like a maintenance agreement, where it might be something like just a few thousand dollars, and they use us a couple times a year, and I might never hear from them. They may never call us. But they keep that little agreement just in place, just in case something happens.

So if we use 5,000 of the 20 and we bill you for it, that would be all that we spent. It was just we did \$5,000 worth of work. Here you go. So just because we write an agreement for 20,000 does not mean that we will spend \$20,000 on the agreement. Go ahead. MR. GOLDSTEIN: I think just to follow up on Eric's question. When is the most efficient time to begin? We need something to happen now.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	there's anything any changes that were made to it. MS. And normally, like I said, that is a government form. It's very black and white. It's not something that I can modify without it going to our old lawyers. MS. McCORMICK: Yeah. It did get to the lawyers MS. THOMAS: Yeah. Yeah. No MS. McCORMICK: when we initially had done it. MS. THOMAS: Like I said, I can provide that, that's no problem. The biggest question	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	not exceed amount. So, for instance, let's just say you wrote the agreement for \$20,000, just a flat number, 20,000, and let's just say you all sign it enacting as of February 1st. 20	I would rather not be behind the eight	20	MR. CHESNEY: I mean, is your plan going

22	you're like, hey, Cailey, I've got birds, and	22	we could approve the other amount. Right?
23	then now we're trying to get the agreement and	23	That's what I'm just trying to

I've seen a couple of proposals now for that work, and I know it is, you know, somewhat significant work that has to be done by the engineering firm, but I think, you know, to get a cost proposal, especially for this district that's an older district that has older infrastructure, would be helpful for them. MR. DVORAK: Yeah. Well, and I we were thinking about doing one for all of our districts. It was just to put together, you know, scope and, you know, a man-hour cost estimate attached to it, so, you know, to be able to look at.

10	Go ahead.	10	they can't file the application unless we
11	MS. McCORMICK: Yeah. So Vertex is very	11	agree to this.
12	anxious to get the special use zoning	12	And then the other document that I had
13	application submitted to the county. In fact,	13	transmitted as a variance application, they
14	they wanted to get it submitted before like	14	are going to they're foreseeing that
15	before the holiday, which really wasn't	15	they're going to be requesting a variance to
16	possible to, you know, have the board have a	16	the landscaping requirements that the county
17	chance to take a look at this, so now I think	17	has for cell towers, because in this location,
18	they're shooting for a submittal date that's	18	there's a lot of existing trees, that they
19	at the end of January.	19	want to use the existing landscaping and trees
20	The zoning drawings that I had	20	that are there as opposed to putting in new
21	circulated yesterday I had provided to Robert	21	stuff.
22	a while ago, and he reviewed them, and he had	22	I don't know what the date is that they
23	some comments to them, which I forwarded to	23	are planning on submitting the variance
24	Vertex, and Vertex has said that they're	24	application, but they're asking for the board
25	incorporating them into the zoning, but as of	25	to go ahead and approve all of this tonight.

So there's not really a continuing requirement if something is destroyed later for, you know, a developer or anybody that's doing a project to go in and replace that based on the zoning conditions that are imposed by the county. MR. ROSS: So the answer is, no, they would have no obligation to replace a damaged or dead plant material, and they could just leave it barren? MS. McCORMICK: Well, yeah. I mean, remember, this is the cell tower site we're talking about on the north, so and we are the property owner, and we're going to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	landscaping or the trees that are there that are around the proposed cell tower setting, I guess, Robert, my question is, is there anything that we would want to do that to protect the district in that case?
